Wrong Number Use Latest Directory Now

Telephone users in Acton and vicinity had their first look at the 1955 edition of the telephone directory this week but because many of the changes contained in the book will not be effective until Sunday, December 4, they should continue to refer to the old directory until that day.

C. S. Keith, Bell Telephone manager for this region, said that thousands upon thousands of new telephone numbers are listed in the 200-page book and that most of these will only go into effect on December 4. Therefore, using the directory too early will only cause "wrong numbers" which in turn will lead to confusion and

The mass change of numbers is the result of the introduction of a system called the "two-five numbering plan" under which alf telephones will have numbers consisting of the first two letters of an exchange name, plus an exchange numeral and four other figures. The plan will go into effect in the exchanges serving Waterloo, Kit-

Hespeler. Another significant change is found right on the front cover of recently recoasted in masonry finthe new telephone "who's who."
