#### Cost Analysis Figures Pleasing M.P.'s May Hear 72 Herd Owners in Groups More Talk About

The 72 Halton herd owners who are enrolled in Halton's three Dairy Herd Improvement Associations or Groups, this past week received their cost analyses figures for the year ending April 30th, 1955. This in our opinion is one of the most valuable and appreciated pieces of extension work beng conducted by the Ontario Department of Agriculture. high net returns and the average of In any event during the past few the two herds with the Low Net Redays, several of the D.H.I.A. members have brought in their individual reports, and to state they were well pleased with the service is put- or "Strong". ting it very mildly.

At this office we get a summary for each of the three groups. The breakdown for each group reveals the following:

(1) Production per cow;

(3) Labour Efficiency; (4) Capital Use;

(5) Size of Business. Under each of the five factors, is presented the average for the 24 herds in each group; the average figure of the two herds with the turns. In addition, each herd owner receives the figure for his own herd with a rating, "Weak": "Average":

Hon. F. S. Thomas to Address

The annual Seed Fair sponsored by the Halton Soil and Crop Improvement Association is scheduled for Milton, on March 23 and 24, states E. Ross Segsworth, president of the Association. This event always attracts a "full house" and the Association has been successful in securing Hon. F. S. Thomas, Minister of Agriculture for Ontario, as guest speaker on the afternoon of

Saturday, March 24th. The Honorable Mr. Thomas is a native of the Streetsville district and consequently has many friends and farmer acquaintances in Halton. The Soil and Crop leaders of the county have revised their prize list considerably with a view to encouraging more exhibitors. As in former years, special classes are provided for those with seed for sale-all entries in these classes must be backed by government grade and furthermore the seed offered for sale must be of the same quality and grade as that exhibited. In addition, other classes are being provided with no restrictions on cleaning etc. other than that the grain, small seeds, etc. must have been grown by the exhibitor in 1955. In short, for these additional classes it is not necessary to have seed etc. for sale in order to be eligible to show. This section open to the County of Halton will include classes for wheat, oats, barley, seeds, grain corn; potatoes; 1st cut hay; 2nd cutting of hay;

chopped hay etc.

Junior Section John W. Picket, president of Halthat Halton Juniors will have their Special Junior Farmer Section al displays; special classes for oats, call, A thought of present day edand a Junior Farmer Judging Com- bers. petition as usual on the Saturday morning. All in all, with the Hon. Mr. Thomas as the guest speaker on Saturday, March 24th-the 1956 Hal-

#### **Production Cost**

ducing milk in the 72 herds in Halton in the year ending on April 30th be held at Mrs. L. Ferguson's home last varies all the way from \$2.50 to in February. The Busy Bee W.I. is for the entire 72 herds was \$3.66 per cwt. This figure covers the cost of Several members offered to make Feed, Labor, Overhead, Veterinary, up pillows to be donated to a fam-Breeding Fees, Milker Supplies, ily who had the misfortune of losing Marketing fees, Milk Haulage, plus all their home possessions by fire. the dairy share of the farm taxes, Mrs. H. Blyth was won by Miss Minnie tion, per cow is always an important | Somerville and Mrs. D. Moffat. factor in the cost of productionnevertheless this study and all other similar farm management studies reveal that it is only when operator is above average on all five factors previously listed that he gets his cost figure for producing 100 lbs. of milk down between the \$250 and \$3.00 mark. In short, it is possible for an operator to be strong on four of the five factors listed and if much below average on the fifth factor, still end up with a losing proposition.

Or to present it in a different way. it would seem that obtaining average efficiency in all five factors leads to lower costs than was obtained by any group of herds which were the best in any one factor but which may have been low in other factors.

Dairy Herd Improvement Work is a policy only for grade or mixed herds of grades and purebreds. It is organized in Halton under the Milton office of the Ontario Department of Agriculture. The Ontario Livestock Branch is responsible for the supervision on production etc., with the Farm Economics Branch providing the cost analysis, etc. Halton is one of the few counties in Ontario with three Associations the local supervisors being F. Chisholm for Halton East; George R. McCormack for Halton West; and Howard King for Halton Centre.

Tariff duties were introduced in 1859 to promote the growth of domestic industry.

### Halton's Seed Fair This March

Halton Is Accredited

A T.B. Free Area

At a recent livestock meeting in Halton the question came up, "When will Halton be due for another general test under the T.B. Area Plan?" Upon investigation we find that the last general test in Halton was in of reactors did not exceed twotenths of one per cent. Halton was then declared an Accredited T.B. Free Area for a period of six years. Consequently the accreditation of Halton does not expire until May 1. 1957. Cattle from such area herds are eligible to be shipped for export to the U.S. the same as cattle from area. "Oh! I'm glad you called -I was worried."

#### The telephone rings and everything's OK

So many of the calls you make every day say "Don't worry"! When someone has to work late, or can't keep a date, or has to cancel an appointment, the telephone lets other people know.

At times like this - whether you are making the call or receiving it - the ready reassurance provided by your telephone can be precious beyond words.

This is just one of countless examples of how your telephone pays its way, as it makes life happier, easier, more secure.
