New Fire Engine Seems Definite For Georgetown

A \$10,000 fire engine pump seems definite this year for Georgetown, unless councillors change their minds.

LeRoy Dale, chairman of the fire committee of council, said his committee has discussed it with fire department officers, and he believes the town is too large to be served by the present 15-year-old fire engine. Citing a fire at the Berwick Hall apartments recently, he said it might have been disastrous had a pump not been used. The town has been using the machine purchased by the township fire area for such local fires, and should it be in use in the township where there is a local call, firemen would not have the proper equipment to put out a blaze with a minimum of damage.

At Berwick Hall, only 125 gallons of water from the 500 gallon tank were used to extinguish a stubborn fire in a stairway, he said. His committee was empowered to get quotations from two firms making the engines, and there seemed to be general agreement that a new fire engine will be in use before the end of the year.

Indian Relics Decorate House

SOOKE, B.C. (CP)—Mrs. M. G. Sember has gathered a huge collection of Indian relics and jade pieces on display at her home in this town near Victoria.

The 70-year-old collector, who came here from the prairies 14 years ago, likes nothing better than showing off her treasures to visitors. A big glass cabinet is filled with arrowheads, beads, spear points, harpoons and other relics. She prizes most an Indian war club with bloodstains on it. Some of the relics were collected on the prairies, but most of them were found in this area. Beautiful agates were picked up on the beaches just north of here.

"Agates are getting scarce, but they still can be found," she said. "I have a rare blue one which I had mounted in a silver pendant."

For charming the clever and worldly-wise man.
