Reptilian DOG-TAGS

We are often amazed how aluminum gets around to unusual places. Who would think of looking for aluminum in the stomach of a Zululand crocodile? It seems when this croc was emptied, no less than 32 aluminum dog tags were found in its stomach, which suggests that Zulu dogs are mighty careless. But it proves that aluminum is immune even to the formidable digestive juices in this reptile's insides.

Industry capitalizes on this resistant quality of aluminum when industrial fumes and other corrosive conditions present a problem: one of several reasons why this modern metal is in such heavy demand - and why Alcan is again increasing its already large smelting capacity.
