POET'S CORNER

WAS IT YOU?

Someone started the whole day wrong—was it you?
Someone robbed the day of its song—was it you?
Someone sulked until others arowled.
Early this morning someone frowned.
And soon harsh words were passed around—was it you?

Someone started the day right—was it you?
Someone made it happy and bright—was it you?
Early this morning we are told Someone smiled, and all through the day
This smile encouraged young and old—was it you?

A little more smile—a little less frown,
A little less kicking a guy when he's down,
A little more "We" a little less "I",
A little more laugh, a little less cry,
A little more flowers on the path ways of life,
And fewer on graves at the end of the strife.

Parent Instruction Problem Eased by Easter Seal Society

One of the most important phases of the work of the Ontario Society for Crippled Children deals with adults—the frightened and bewildered parents of handicapped youngsters who are sent home for further training after an initial period in a residential training centre.

"Few parents have the equipment, skill or emotional equilibrium to carry out the proper treatment for a cerebral palsied child in the early stages," said Mrs. Gordon Richards, co-ordinator of the Society's cerebral palsy division. "That's why one of the Society's chief aims over the years has been to band together these people into Parents' Councils and try to make them understand the first thing to be done is to get the child out of the home and into a training centre routine as quickly as possible after diagnosis."

Of Ontario's 22,000 crippled children, some 3,000 are afflicted with cerebral palsy and of these, more than 1,000 are now undergoing treatment in 21 special C.P. centres such as Woodlawn near London, Ont. There, because of the backing financially by Easter Seals, they receive physiotherapy, occupational therapy, nursery school training and take part in a program of rehabilitation unexcelled any place on this continent.

The goal is to help the child help himself—make him mobile, able to dress and feed himself and to make the most effective use of his physical and mental assets.

It is a black eye to our neighbourhood if everyone doesn't show up for a chest x-ray.

- Here's why:
1. It is free. Getting an x-ray doesn't cost a cent.
 2. Only a few of us have received a chest x-ray this year. The rest of us have to get one, before we can know we don't need it.
 3. When we get a chest x-ray we are helping to prevent tuberculosis in our children. If we don't, we are asking tuberculosis to stick around. This will rate two black eyes in any of our parents' books.
