Approval in principle of the 19 cent rate for local calls from all of Bell's public and semi-public telephones was given in November, 1951, by the Board of Transport Commissioners for Canada. However, because of equipment shortages at that time the Bell asked for the higher rate to be applied immediately only in the large centres.

With equipment to modify the public telephones in the smaller centres now installed the company has decided to complete the application of the standard rate throughout its territory.

In the past few years Canada's steel production capacity has increased by 30 per cent, a more rapid expansion than that achieved by the steel industry of any other major nation.
