

# Only Eleven Business Days Left To Convert Your Victory Bonds

Local residents who have not yet exchanged their Victory Bonds for one of the new Canada Conversion Loan issues are being urged to do so at once since there are now only 11 business days left until September 15 when the conversion of the ends.

Many local people and business have already completed their conversions and added to the huge total for the whole Dominion. With returns now coming in increasing volume from the smaller centers, the total now converted is more than twice the amount of the original Victory Loan campaign during the war.

Local banks and investment officials are being urged to advise their clients to take advantage of the following:

1. Examine all possible places in your home or office for possible bonds.
2. If you have any bonds in your possession, exchange them for the new Conversion Bonds right away.

3. If you do not have any Victory Bonds but are looking for a good investment, ask your bank or dealer to buy some Victory Bonds for you and then convert them to the new issue.

4. Consider the long-term four and a half per cent bonds as investments for your children, but remember there are three other shorter terms to choose from.

5. The term "non-callable" does not mean you cannot sell your Conversion Bonds at any time. It simply means that you cannot be compelled to sell them until their maturity date.

During the war, this community had a quota for each Victory Loan campaign. Its Canada Conversion Loan quota is 100 per cent conversion of the bonds still held there.

# THE PRESERVING KETTLE

What's autumn without grapes? And what jelly cupboard is complete without Grape Jelly? Why not make your own, using this successful recipe?

**GRAPE JELLY**

4 cups juice (about 3 quarts ripe Concord grapes)  
7 cups (1 1/2 lbs.) sugar  
1/2 bottle Certo fruit pectin

First, prepare the juice. Stem about 3 quarts fully ripe grapes. Crush thoroughly. Add 1/2 cup water; bring to a boil. Simmer, covered, 10 minutes. Place in jelly cloth or bag and squeeze out juice. Measure 4 cups into a very large saucepan.

Now make the jelly. Add sugar to juice in saucepan, and mix well. Place over high heat. Bring to a boil; stirring constantly. Stir in Certo at once. Then bring to a full rolling boil. Boil hard 1 minute, stirring constantly. Remove from heat, skim off foam with metal spoon. Pour quickly into glasses. Cover at once with 1 inch hot paraffin. Makes about 10 medium glasses.

What is pectin? It's the jelling substance found in all fruits in varying amounts. Certo is pectin extracted from fruits rich in this natural substance; then refined, concentrated and performance-controlled. Your jam and jelly set exactly right when you use Certo and follow the tested Certo recipes.

Preserving Painter. Never open a jar after sealing, to fill the jar which may appear at the top. If the seal is completely air-tight and has been properly and sufficiently processed, the food will keep perfectly. Breaking the seal and adding more fruit may easily cause spoilage and waste the whole jar!

This is my last column for the year. What fun it's been writing with you! I know that you and your family will truly enjoy all the good things you've been able to preserve so successfully by following these tested, Certo recipes.
