

Expect Halton to be Third County Certified Brucellosis Free Area

Oxford and Prince Edward cattle population reacted to their test.

The figures quoted do not include herds being dealt with under the Federal Department's Listed Herd policy.

Incidentally, we understand that all herds in Halton with the exception of one have now been dealt with under the Brucellosis Control policy, and we anticipate by the time this appears in print that particular herd will have been dealt with.

Thirty 40 and 90 day tests are under way in the infected herds. Certainly Halton cattle owners have every reason to be happy with the results of the test.

Much of the credit for the low percentage of reactors can be attributed to the Calfhood Vaccination program undertaken in 1947 according to reliable information we have received.

This means that 7.85 per cent of Halton cattle premises were found to have cattle infected with Brucellosis and approximately half of one per cent of our total

Milk Producers Elect Officers

Addressing the annual meeting

of District No. 12, Toronto Milk Producers at Stewartswood on

Thursday evening last Allen Lashman, president of Toronto Milk Producers, stated there are in 1958 over 1,000 fewer shippers to the Toronto Milk Shed than there were eight years ago.

On the other hand, with a three per cent increase in consumption of milk, the 2,860 shippers to Toronto in the past 12 months received payment for 152 million pounds more milk at secondary price than was the case in 1950.

Eight years ago 280 lbs. was the approximate average shipment; today the average shipment is 580 lbs. Since bulk tanks have gone in the average shipper has increased his shipments by 28 per cent. These figures are indicative of the trend towards fewer and larger shippers.

Comparative Figures

President Lashman also presented comparative figures for the years 1949 and 1957, to show the share of the consumer's dollar being received by the various commodity groups.

In the case of hogs, the producer receives 40 cents instead of 62 cents as he did eight years ago.

The wheat producer has to be content with 3¢ instead of 40¢ - the egg producer's share of the consumer's dollar has in that same eight year period dropped from 9¢ to 6¢ - the beef producer is now receiving 5¢ instead of 8¢ that he did in 1949.

In the case of fluid milk, the milk shipper is receiving 32¢ instead of 3¢ as he did in 1949.

Credit for this narrowing reduction suffered by the fluid milk shipper, stated Mr. Lashman largely goes to the policy of formula pricing adopted a few years ago.

Equally interesting messages were brought by secretary-manager John W. Pawley of the Toronto Association, fieldmen Wm. McCordale and Howard Hooper, manager Harrison of the Toronto Coop Surplus Milk Plant and district director Kyle Bingham.

Worthwhile Program

In short, it was a very much worthwhile program presented by vice-president Hugh Bird and to secretary John M. Bird goes a bouquet for the excellent leadership which he continues to render the Toronto fluid milk shippers of Halton and South Wellington.

The newly elected board of directors follows: president, Hugh Bird; vice-president, J. C. Bell; secretary-treasurer, John M. Bird; Directors: Esquinton township, Stanley Morrison; Frank Robertson; James C. Read; John Riddell; E. d'Vries; Hector Bird; Nassauwawa township, W. L. Ferguson.

West Halton D.H.I.A. Group Average Cost \$3.15 Per CWT.

West Halton Dairy Herd Improvement Association, supervised by George R. McCormack, produced milk in the year ending April 30, 1958, at an average cost of \$3.15 per cwt.

These figures just released by the Farm Economics Branch of the Ontario Department of Agriculture, included costs for feed, labour, overhead and other costs such as veterinary, insemination, milk supplies, marketing fees, milk hauling, dairy taxes, farm taxes, insurance, etc.

We further note that the cost figure varies from a low of \$2.84 per cwt. in the case of the two herds with the high net returns, to \$4.22 per cwt. in the two herds with the low net returns.

The average production per cow in this group was 10,019 lbs. of milk and 370 lbs. B.F. This average figure includes all cows in the various herds, irrespective of age and whether or not some of the cows completed their DHIA records.

It is noticeable that there has been a steady increase in the size of herd since DHIA came into effect a few years ago in the West Halton group, the number of milking cows ranges from 17 to 27, with an average per herd of 20.

Each herd owner receives a confidential report which indicates whether his own herd rates well, average or strong in comparison with the average herd in his group from the standpoint of production, feeding efficiency, labor efficiency, capital use and size of business.

Erin Confirms Assessments

A special meeting of Erin township council was called by the reeve as a court of revision on the assessment roll of the township on November 24.

Reeve H. L. Griffin acted as chairman for the court of revision which dealt with the following properties:

G. Gregory, Lot 23 Con. 10 East subdivision confirmed.

Ralph England, Lot 8 Con. 10 West assessment confirmed.

Mary Elsbeth, Lot 24 Con. 11 East and West assessments confirmed.

Schulm Lumber Co., Lot 3 Con.

The Acton Free Press, Thursday, December 4, 1958

11

H. East. This assessment had been transferred.

Alfred Kelsey, Lot 1 Con. 1 West assessment confirmed.

Ron. Waland, Mountain View subdivision assessment confirmed.

Georgina Stone, Mountain View subdivision assessment confirmed.

Eric C. Beale, Mountain View subdivision assessment confirmed.

C. E. C. Blawie, Mountain View subdivision assessment confirmed.

J. J. Mallard, Mountain View subdivision assessment confirmed.

Charles M. T. Mountain View subdivision assessment confirmed.

The assessment of 1958-59 tax was reviewed and confirmed.

A. Taylor was present for the purpose of presenting members of council to take the measurements.

Third Meal Big Problem Institutes Find Solutions

Here is a special message to the ladies. It emanates from our home economist, Mrs. Mabel Borgstrom. Are you wondering what to have for supper?

According to Mrs. Borgstrom, most ladies find breakfast easy and even dinner the big meal of the day, is not difficult because it usually follows a definite pattern.

But supper or lunch, the odd meal for which only part of the family is at home or which for some is carried to school or work is the one which causes most housewives to despair.

Help is on the way in Halton County because the Home Economic Service of the Ontario Department of Agriculture has been conducting a training school called "The Third Meal".

This was held in Milton on Tuesday and Wednesday of last week under the direction of Mrs. Borgstrom and with Miss Mary Purtrois of the Toronto staff as instructor.

Those in attendance and the Institute they represented follows: Mrs. Campbell Sutor and Mrs. Marion Harness of Brantford, Mrs. Frank Brown and Mrs. Gilbert English of Lachine, Mrs. David Lawson and Mrs. Henry Allard of Scotch Block, Mrs. Norman Elliott and Mrs. Mabel Frank of Dublin, Mrs. Gladys Chester and Mrs. Louise Cleave of Norval, Mrs. W. Coulton and Mrs. John Wallace of Hornby, Mrs. W. R. Hume and Mrs. A. G. MacNab of Mountain Union, Mrs. E. Beck and Mrs. O. Locker of Bury Bees, Mrs. Frank Smith and Mrs. J. Snow of Bainsland.

These ladies will go back to their respective Institutes and pass on "The Third Meal" instruction to as many women as wish to participate. This will not be until after Christmas, but the actual time will be left to the discretion of the local leaders.

Many a perfectly good pair of headlights need adjusting. They should be focused at a point just close to the car. Thus depending on your field-distance vision. On the other hand, don't have project height or width. Even slight adjustments by one headlight can decrease your aim as much as one third the illumination you should be getting.

The sealed-beam light gives many a driver a false sense of security since its efficiency is perfect until it gets totally blind. However its ability to light up the road depends upon its alignment too.

Although headlight adjustment is simple to make precision instruments are required to do the job properly. For about one dollar, any headlight inspection station or your car dealer will give you this most important safety precaution.

These ladies will go back to their respective Institutes and pass on "The Third Meal" instruction to as many women as wish to participate. This will not be until after Christmas, but the actual time will be left to the discretion of the local leaders.
