Raspberry jam is one of the easiest to make, as well as the most delicious, so why not try this very successful recipe?

RASPBERRY JAM 4 cups prepared fruit (about 2 quarts ripe raspberries) 61 - cups (214 lbs.) sugar t. bottle Certo fruit pectin

To prepare fruit. Crush completely, one layer at a time, about 2 quarts fully ripe raspberries, tlf desired, sieve half of pulp to remove some of the seeds) Measure 4 cups into a very large saucepan

To make your jam. To the measured fruit in saucepan, add 612 cups sugar. Mix well Place over high heat, bring to a full rolling boil Boil hard I minute, stirring constantly. Remove from heat, stir in Certo at once Skim off foam with metal spoon Stir and skim for 5 minutes to cool slightly, to prevent floating fruit Ladie into glasses. Cover at once with in inch hot paraffin. Makes about 10 medium glasses

When we mentum "pectin" many women say "I don't really understand what it is" Well, pectin is simply the jelling substance found in all fruits in varying amounts Certo is pectin extracted from fruits rich in this natural substance, then refined, concentrated and performance-controlled So naturally, when you use Certo and follow the tested Certo rectpes, your jam and jelly always sets perfectly!

Preserving Pointers: It's a good idea to temper all new glass jars before using in order to prevent breaking. Simply place the jars on a rack in a pen, cover with cold water, and then heat gradually to the boiling point

Keep canned fruits in a cool dark place The darkness protects the color the coolness helps preserve the flavor

Keep an eye out for my next column which will have another recipe By the way, if you have any problems with your jam and jelly making, I wish you'd let me know I may be able to help you
