The first aid kit and insurance both have important roles to play in the event of accidents.

Each year, the companies writing accident and sickness insurance in Canada pay out more than winery million dollars (not including automobile accident costs) to policybolders - a mighty bulwark against unusual financial strain.

It is far better, though, to prevent accidents and mishaps, rather than to deal with the treatment of their serious-and often tragic-after-effects. That is why insurance companies are constantly seeking ways to stem Canada's mounting accident toll.

Safety pays dividends . . . saves lives, helps to lower your insurance costs. Be Careful.
