Totals from the various polls were posted on a master board in the brightly lit editorial office of the Free Press as interested onlookers peered over the shoulders of the tabulators.

Two Elections in Georgetown

GEORGETOWN A hitch in the mayoralty nominations will mean a second nomination meeting for Georgetown's mayor, and a second election on this year.

Residents in the town will vote December 3 to choose a Deputy Reeve, six councillors and a two year term. Acquaintances were seen for the post of Reeve, school trustees and hydro commissioner.

Mayors Both Out

The incumbent Mayor John Amos was nominated for the top post but decided to quit. In case he wanted to get out of municipal politics, Mr. Ernest Hyde was nominated for Mayor but because he was first nominated for Reeve and found his name was taken to stand for Reeve, he did not qualify for this position.

After the Monday election, the town will hold a second nomination meeting to name mayoralty candidates. A second election, if necessary, will be held later in the year.

List Candidates

Residents named the following Reeve candidates: Douglas Scott, Walter H. Gray, James H. Kremser, John A. Hickey, John D. Kelly, Peacock Peter, Fred H. Harrison, Harrison Wood, William F. Hunter.

142nd Year

Report Shows Borrowing Up

More Canadians borrowed more money from the Bank of Montreal in 1958 than ever before, according to the bank's annual statement, released here this week by William MacKay, manager of the Action branch.

Commenting on the bank's 142nd year of business, he said the unprecedented demand for credit of all kinds came in one of the "tightest" money periods of recent times. In total, B of M loans were more than 25 per cent above the 1956 figure. \$1,772 million compared with \$1,418 million.

These included a 32 per cent boost over 1958 in N.H.A. mortgage loans, from \$171 million to \$227 million, enabling more people to buy homes of their own.

To cope with Canadians' loan demands, the bank reduced its security holdings by more than a quarter. These are now reported at \$60 million, or 28 per cent lower than a year ago.

As a result, although the B of M maintains a strong liquid position, "quick" assets now stand at

what he intends to do. That one way, of course, is the signal.

Signalling Importance
Left-hand turns, right-hand turns, stops, lane-jumps, and other motorists movements can be easily made only when the road is clear. The drivers and pedestrians know they are coming. Some drivers simply don't bother to signal.

Why, they ask, should they do out of their way to tell others what they're going to do? This is a simple if they don't interfere with a fellow driver.

Police have found that a frightening large number of drivers

protect, not Ants for the rest of traffic but for themselves. No motorist is a mind-reader, cautions the Canadian Highway Safety Council and urges every motorist to make sure in everybody his intended movements in traffic, particularly in case of "Safe Driving Week" (Nov. 16-22) coming up in
