

Position Ontario

growth hown by d Acton position

In all of the national growth in Canada, Ontarió has shown by far the greatest gains and Acton now enjoys a strategic-position of impressive importance.

In natural resources Canada ranks as one of the wealthiest countries in the world. In area, it is third largest.

Of its ten provinces, Ontario is the most central, the most populated and the wealthiest.

Acton is located in the hub of industry which circles the capital of the province. Toronto.

Acton enjoys natural growth paralleling the increasingly important position occupied by Canada in world affairs.

With its vast supplies of raw materials, its greatly expanded capacity of production, its rapidity growing domestic market and increasing foreign demand for its products, Canada now ranks among the world's leading trading nations.

Specialize thers 3 Work

One of Acton's smaller but work mitts, ski mitts, children's growing industries was started in 1954 when Enio and Ilio Mar- Both the brothers are experzo, well known in hockey circles ienced glovers and had years of and arenas around the circuit, training with the Storey Glove started a glove factory of their Company before it closed. They own.

The company specializes in Acton.

The company specializes in A SPECIAL SERVICE

Decoration Day, instituted in a nually since as a community event. A parade and service precede placing of wreaths and flowers on the grates at Fairview. The event is Imanced by donations from organizations which the met to first arrange the observance six years ago. Many former fresidents return to town for the creations return to town for the creations. The small company employs eight others beside themselves in and they have four travellers dovering Ontario and the western provinces. All their supplies are purchased in Ontario with a majority of the products sold throughout the province.

They find their products much in demand and are content with the markets developed. They like Acton, Acton is their home and plove shops and glove workers have been located since Acton's early beginning.

With Y. Smallest Believed Town

Acton is said to be the smitown in the world to have Y.M.C.A. It was established in 1935, and has offered a popprograms for adults and chilesing. mallest ave a d here opular hildren

Secretaries directing programs during the 1950s have been Cliff Sutton, Dick Schmull, Bob Brayshaw, Dave Docherty and now Sid Saitz. For the 1958-59 season, the Y board and the Y's Men's club operated the Y themselves without a full-time secretary.

Add Improvements

In 1952 the kitchen received a major face-lifting sponsored by the Y's Men's club. Other improvements include a new basement exit, washrooms in the basement, hall reception counter and redecoration.

Coupled with the active 'Y's Men's club is the Y's Menettes club, formed in January, 1957.

The Y Ladies' Auxiliary sponsors a very popular nursery school.

District Soils Good व् व Hunting Mixed

With its rolling countryside the main and its sandy loam soil, a good land that agricultural land surrounds 'Ac to's rugged ton. While its farms may not be lakes. In the heavy producers of some other districts, its hills and hot lowed to man are trout creasing and to some rugged and picturesque scenery.

Cattle raising is becoming infarmers at the office of the Department of Agriculture in nearby Millton. Despite residential infarmers is big business' and his increased staff moved to name of the name of the particultural representative entrances and his increased staff moved to name of the particultural representative conganization of the last few organization of the last fe the main travelled roads to find land that rivals Northern Ontario's ruggedness, but is minus its lakes. In spring, and fall, the bush lands are within easy reach for those who like to commune with nature.

An open season for deer is sometimes arranged since this game becomes bothersome if allowed to multiply too long. There are trout streams in the district and the duck hunters have a bang-up time every fall. Of course, rabbit hunting is weekend sport for many during the winter season.

It is only necessary to travel a miles from town and get off In August, 1956, three farge d signs were erected at the town e entrances spensored by the commerce and other of Chamber of Commerce and other name of the town, population and location, with the town crest, a Legion, Rotary, and Y's Men's forcests.

Jnderground ires, Substation in Past Decade Substation

Added

From one substation to two, from an old garage to a new workshop, from overhead wires and a pole-lined business section to underground wires and steel standards — a few of the changes that hydro has undergone in Acton during the past decade.

Purchase Site

Early in 1950 he Hydro Electric Power Commission purchased two lots on the corner of Hillcrest and Queen Sts. for the town's second power station. Members of the local commission agreed to purchase a balance of the land for use as a pole yard.

By October of that first year in the decade, the new sub-station was completed adding 2000 KVA to the 1500 KVA that was supplied from the original station on Willow St. Features

wo, the town's hydro, water and sewtew or systems, installed a billing
ires machine and addressograph
soquipment. Until that time alt the
teel hills issued monthly had been
ges typed.

Ac. In September, too, plans were
made to remove the unsightly
poles from the north side of Milllee. This involved moving services to
of the rear of properties and inshalling steel standards on Mill
on.
St. to support street lights.
Improve Lighting
of In May of 1951, plans were
d. other two business blocks with
in sleel lighting standards and unother two business blocks with
in sleel lighting standards and underground wiring. Today of
va course the entire business section
has benefitted from the improvement that was gradually extended throughout its full length.
Changeover from 25 to 60 cycle
the power came in November, 1954,
in when over 100 men, and 80 vehbeicles deployed through Acton for
the nine-day job. Most appliances
her were converted in the homes and
ins. factories, but small clocks and
fans were exchanged in a depot
Ut. set up in St. Joseph's church
of basement.

The beginning of growth that made the decade one of the greatest development periods in the history of the town, was being experienced in the hydro department, as well as most other sections of municipal operations.

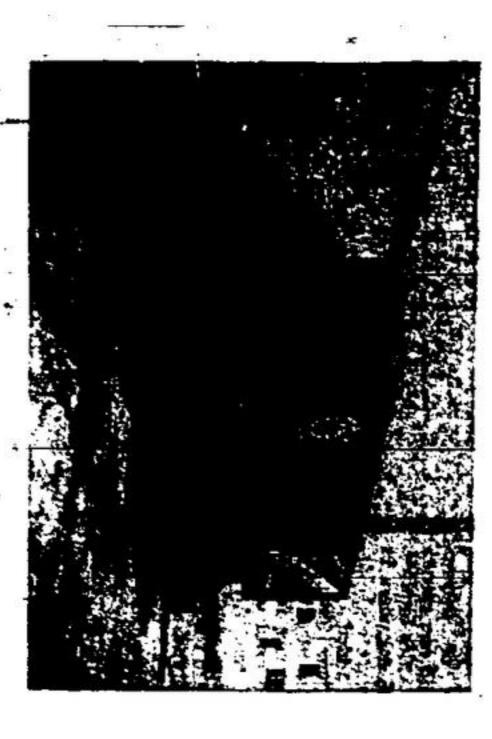

Update Billing
In July of 1950 the Public Utilities Commission, operators of
