

Halton Holstein Breeders' Meeting To Hear Dairy Princess Contestants

Those interested in Holstein cattle in Halton will be looking forward to the annual Halton Holstein Breeders' Twilight Meeting. The Twilight Meeting will be held in the Hays Sales Arena, Trafalgar, on Friday, May 20. In addition to Holstein breeders and their friends, the Halton 4-H Dairy Calf Clubs and those interested in the Halton Dairy Princess Club, will be in attendance.

Grading and judging of Holstein cattle will be demonstrated and the audience will take part in judging the classes. A panel of five members of the Halton Holstein Club will act as official judges, and Ross Segsworth, Burlington, will be chairman of the judging panel. Mr. Segsworth is vice-president of the Canadian Holstein-Friesian Association of Canada. The evening will be under the direction of J. H. Taylor, president of the Halton Holstein Breeders' Club; J. A. Francis, agricultural representative, Halton county; and George Drennan, Holstein-Friesian fieldman.

A panel discussion on Dairy Cattle Management will include as panel members: Dr. J. C. Renic, Animal Husbandry department; D. S. Dutton, Brampton; first vice-president, Holstein-Friesian Association of Canada; and Abner Martin, Waterloo county, a director of the Holstein-Friesian Association.

The panel will discuss problems in management, methods of feeding, and the use of records in dairy production. Farm safety will be stressed in a demonstration presented by the Extension Branch, Ontario Department of Agriculture, and also W. Ross Milne, agricultural engineering specialist, who will be in charge of demonstrations to outline fire prevention in farm buildings.

Three Halton dairy-maids will compete for the honor of representing Halton in the Dairy Princess Competition at the Canadian National Exhibition.

The three contestants are Mary Lou Taylor, Burlington; Lillian Finnie, Hornby and Evelyn McKay, Georgetown. Each contestant will be interviewed by a panel of judges and will present a talk on the dairy industry in Halton county.

The program gets underway at 7:30 p.m. and with the events mentioned, plus draw prizes and lunch, will make a varied program for those attending.

Urge Control of White-Grubs Recommend Proper Insecticides

White grubs can cause damage to lawns, parks and grass pastures in Halton this year. Last year there were large flights of June beetles in May and June. There was considerable damage in this area in 1957 and so damage can be expected from white grubs in July, August and September of this year.

White grubs, the larvae of June beetles, very often cause a great deal of damage to plants by eating the roots and other underground parts. The beetles, in huge numbers, take to the air at dusk, feeding and mating on the foliage of trees and shrubs.

Grubs' Habits

At the first sign of daylight, they seek out grassy areas, weedy places and uncultivated land, and burrow into the soil, where the females lay their eggs. The eggs hatch in a few weeks and the young grub feed on decaying vegetable matter and the roots of living plants. In the fall they go deep into the soil and remain there during the winter.

This spring when the soil warms up, they will come up to within a few inches of the surface and feed ravenously during the whole growing season on the roots of plants. This is when they do the greatest amount of damage in the life cycle.

Come Again in 1961

In the fall they go down again in the soil and pass the winter coming up again in the spring of 1961. At that time, the grubs will feed only for a few weeks

before pupating and changing to beetles.

These beetles, however, will remain in the soil until the spring of 1962. The cycle will then be completed. Heavy flights will again take place and a new generation will be started.

While it is possible to find all stages in any one year, the majority of insects in most sections of Halton will follow this pattern.

In controlling the white grub, land which was under cultivation during the heavy beetle flight in 1959, does not offer suitable egg laying places. However, where cultivation was not carried out such as in lawns parks and pastures, and where insecticides were not applied directly to the soil, it is possible that heavy infestations may have built up and severe injury may occur during the summer of 1960.

For best results insecticides should be applied during the beetle flight year. However, applications can be made directly to the soil now.

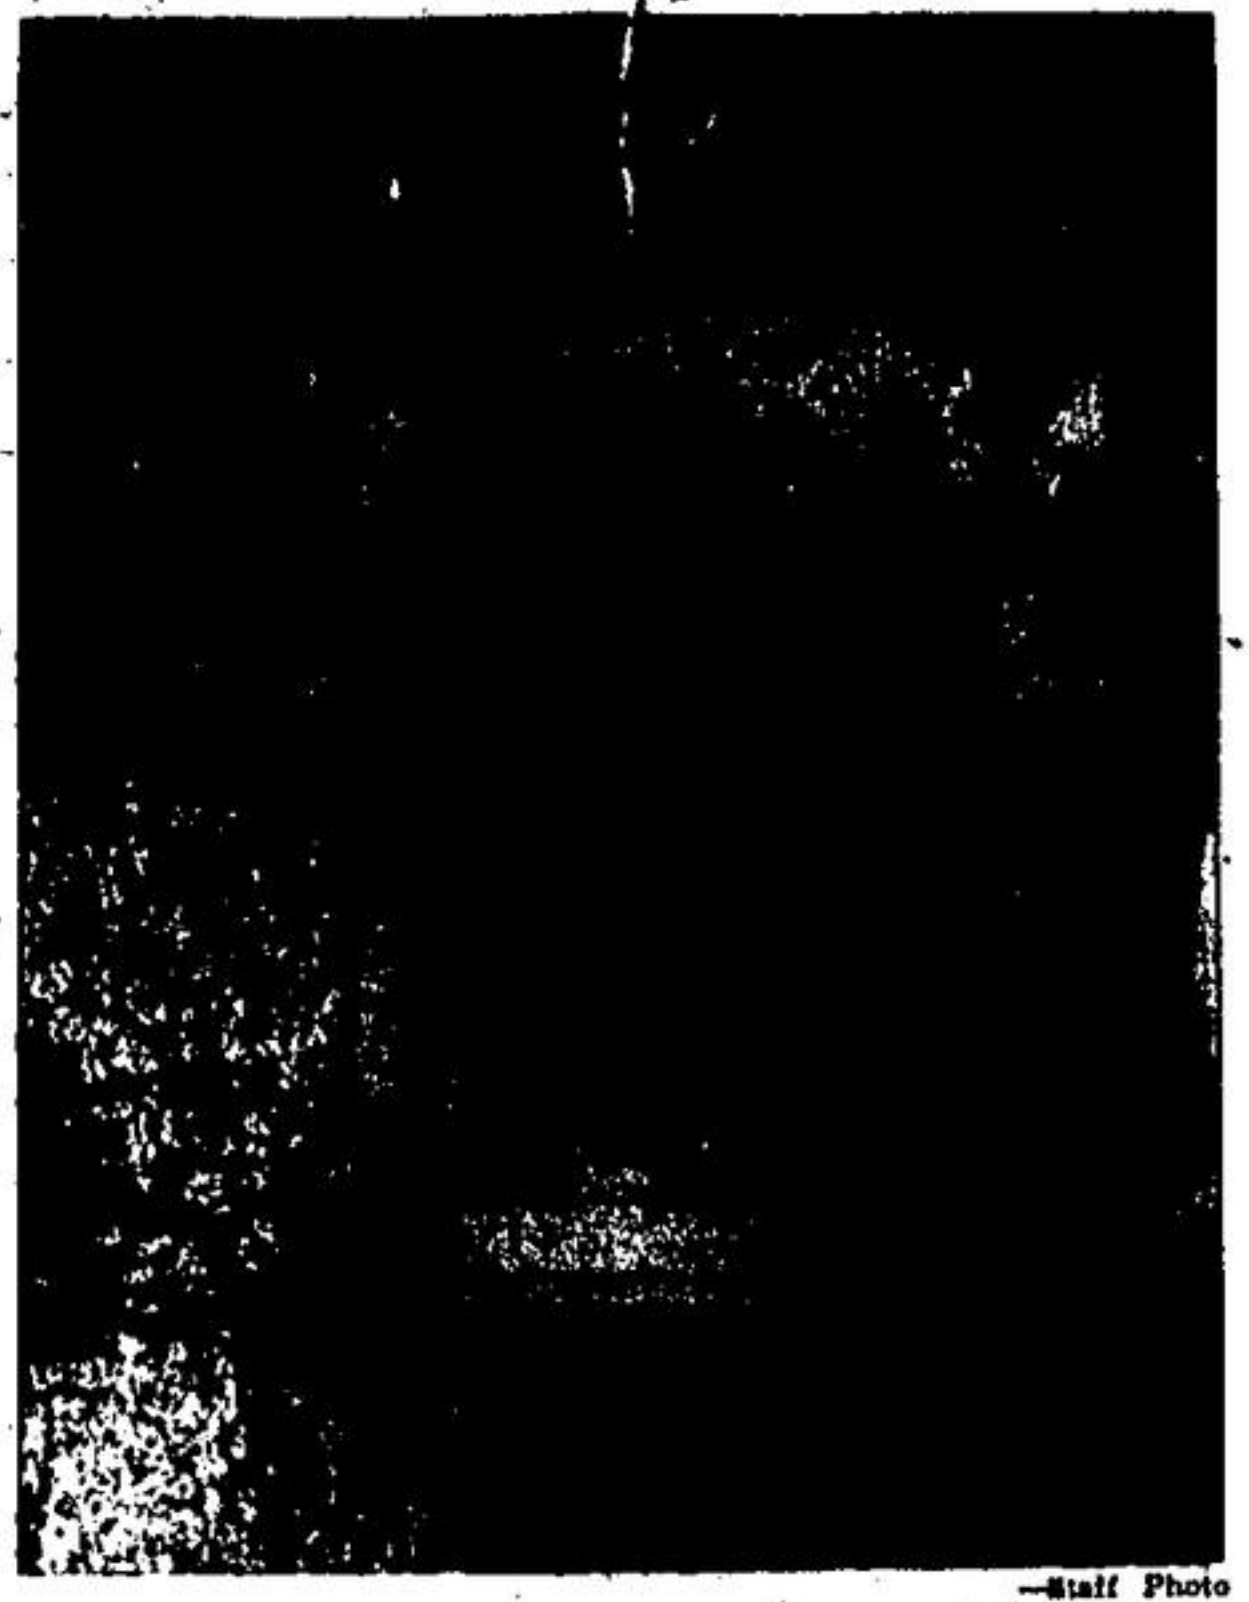

Four Insecticides

There are four insecticides recommended for controlling white grub — aldrin, chlordane, dieldrin and heptachlor.

Directions for applying may be found in the manufacturer's directions or in the bulletin "White Grubs" available at the office of the Extension Branch, Ontario Department of Agriculture.

LAZY SUSANS overlooked their name last week when they copped the championship five pin bowling in the Legion Ladies' League at the bowling lanes.

A winning streak taken by the girls was never overcome by their opponents. Pictured above, front row, left to right, are Janet Rogers, Dot Earle, captain and Mamie Allen; back row, Pudge Jordan, Louise Toth and Dot Emerson.

Holstein Calf Club Studies Bulk Milk

The second meeting of the Halton 4-H Holstein Calf Club was held on May 9 in the Agricultural Hall, Milton, in conjunction with the Halton 4-H Jersey-Chevi-sey Calf Club. The meeting opened with a film entitled "The Modern Way," on the topic of handling to milk by bulk.

After the interesting film members separated into their clubs. Arthur Lawson presided over the meeting.

DOG-GONE DOGS

Dogs frequently kill men — by running out unexpectedly into traffic. The House of Lords recently debated the fact that seven people are killed or injured every day in Britain in road accidents in which dogs are involved. There is an obvious need to train or restrain dogs in heavy traffic areas. Female dogs in season, if allowed to run free, are a special hazard as they are liable to be followed into traffic by other incautious dogs.

THE TRAGEDY OF IT

"Did you hear about Smith, the bank cashier? He's taken fifty thousand dollars from his bank and run off with his friend's wife."

"Good heavens, who will take his Sunday School class this week?"

Name Delegates, Plan Projects At Recent Institute Meeting

Sixteen members of Silverwood Institute attended the May meeting at the home of Mrs. D. Williamson last Thursday evening. Roll call was a written article suitable for the Tweedsmuir history, which brought forth some material for book number two, currently being gathered together.

An invitation was read from the Georgetown W.I. to a pottery demonstration to be held June 1. Voting delegates were named for the district annual to be held May 24 at Lowville. Mrs. W. R. Norton, Mrs. D. Williamson and Mrs. H. Marchington were chosen.

Arrangements were made for the coffee booth at W. F. Earle's sale on May 14 with Mrs. C. Wilcox as convener. Mrs. George Burt and Mrs. Wilson attended

the TB Association dinner, so were unable to be at the meeting.

Guest Speaker

Mrs. Douglas Peck, convener of the evening's program on current events, called on the speaker, Joe Gibbons, who took as his subject the various prime ministers of Canada from Confederation down to the present day, outlining some of their particular problems and achievements.

He told of the wide powers of the federal government over municipal bodies, especially in the fields of highways and education, and spoke also of the duties of the Ontario Municipal Board. He was thanked for his informative talk by Mrs. Peck.

Mrs. H. Lindauer gave current events, which was followed by a

Couple Visit Parents Guests at Wedding

(Intended for last week)

Mr. and Mrs. Bert Benton were guests at the Sewell-Gamble wedding in Temple Hill United church and the reception following in Fairmount Anglican church on Saturday. They spent the weekend with her parents, Mr. and Mrs. Gordon Quinton, Meaford.

Mrs. Robert Patterson had all of her family with her on Mother's Day, including Mr. and Mrs. Arthur Patterson of Houston, Texas.

The community regrets that Sam Gisby is a patient in the hospital in Guelph with blood poisoning in his hand. All hope for his speedy recovery.

Congratulations to Mr. and Mrs. Swinkels on the arrival of a little son at St. Joseph's Hospital.

WOOL

Any Government Deficiency Payment will apply only on properly graded wools.

Secure the utmost by patronizing the organization that made this possible.

Springtime is the best time to install your new automatic GAS heating system!

\$50. ALLOWANCE FOR YOUR OLD BURNER WHEN YOU INSTALL GAS HEAT IN YOUR HOME.

Why contend with the same old heating worries next winter? Heat your home the modern way... with automatic GAS heat. Forget delivery problems and storage worries, there are no service contracts, no expensive repairs (because there are no complicated moving parts) and lower cleaning and decorating costs. Right now is a good time to replace your worn out heating system. Keep in mind that the very best possible fuel you can obtain is Natural GAS. All costs considered, Natural GAS house heating does not cost a penny more than other less desirable fuels.

RENT A GAS BURNER

In just a few hours a dependable, trouble free gas conversion burner can be installed in your furnace. No down payments, no installation costs, no carrying charges and...

NO RENTAL FEE 'TIL SEPTEMBER

The rental fee starts at \$2.95 per month and the service is FREE

5 YEARS TO PAY THE BALANCE

When you purchase a new gas automatic heating system now, there is no down payment until September, the balance can be spread over 5 years, and is payable on your monthly gas bill.
