Still Rising

The proportion of Canadian households Which are equipped with the various domestic conveniences which are so prized in this modern age continues to grow apace.

The latest annual survey of such things carried out by the Dominion Bureau of Statistics shows that 80.6 per cent of the 4:4million households in Canada had television sets in 1960 compared with 74.5 per cent in

By last year, too, 91.1 per cent of households had refrigerators, 86.7 per cent had washing machines and 96.2 per cent had

The percentage of households with an automobile last year was 66.6 per cent, up

from 65.1 per cent in 1969, while 7.4 per cent had two or more.

.The growing trend towards the use of oil and gas for heating purposes is shown, with 66.3 per cent of households using furnaces. of which nearly 40 per cent used oil and 13.6 per cent used gas.

Two items included in the annual survey for the first time were power lawnmowers and outboard motors. There were just over one million power lawinmowers in use in Canada last year, representing 23.3 per cent of total households. Outboard motors were owned by 7.2 per cent of households.

The increasing acquisition of such equipment hardly suggests that Canadians as a whole are having too bad a time of it.

Equality is the Aim

Assessment statistics are sometimes revealing and sometimes confusing. Within a county it is the equality of the assessment which is vital to insure that each town or township pays its fair share to the maintenance of county facilities.

It appears, from the recommendation of the assessment committee to the county council, that there is general satisfaction this year with the equality of the assessment

It is now something like 10 years since Halton completed a major revision in its assessment procedures to develop the plan still used in the northern' municipalities. A new plan, however, known as the DMA manual is being introduced. It is the expectation that use of this standard procedure across the province will provide an equitable base for distribution of provincial grants eventually.

In the reassessment of 1951 mill rates were cut in half as assessment doubled. That's why it is still impossible to compare mill rases across the province and come up with

intelligent conclusions unless assessment is also studied.

Burlington has become Halton's highest assessed municipality carrying 39.74% of the county load. Trafalgar, Burlington and Oakville together cover 83.79% of the county expenditures leaving Acton, Georgetown, Milton, Esquesing and Nassagaweya to share the remaining 16.02%.

Georgetown appears to be the lone dissenting voice to the county-wide introduction of the DMA manual assessing base. It is claimed they would lose a million and a half in assessment, which of course would bring about a compensating rise in the mill rate. In the other municipalities there is going to be some adjustment but apparently nothing as drastic as that anticipated for

We doubt if there is any particular honor in Halton having the highest assessment in the province but it is significant that all the municipalities appear to agree with the distribution of county costs and the percentage tney will bear this year.

Time for Optimism

Spring is everywhere a time for optimism, and not least in Canada. With its coming, the national economy is now showing early signs of the usual seasonal upture in the level of business activity.

Across the 10 provinces, manufacturers are rebuilding inventories, wholesalers are restocking, retailers are reordering and individual consumers are making those all-important decisions the sum total of which will be the biggest single factor in determining both the tempo and extent of the post-winter

Encouraging, too, is the first estimate of capital investment intentions for the year. Proposed expenditures are again expected to exceed \$8,000 million, a massive outpouring which will further improve our productive efficiency, stimulate economic development and generally provide a solid foundation for continued national growth, /

All this, of course, is the stuff of which jobs are made. And the stronger the expression of consumer confidence, the more jobs there will be

'This second quarter of the year, as always, will see a marked drop in the unemployed totals as the tens of thousands of seasonal workers who have contributed so substantially to the high mid-winter figures resume their labours. Within the next three months, on the basis of the usual seasonal pattern, the unemployed figures will be cut in half, a consideration which should be kept - in mind when the as-yer-unpublished figures for March are made known. (Last year, the number of those without jobs fell from 609,-000 to 315,000 between March and June)

The seasonal upswing, of course, does not of itself provide any enduring solution to the: problem of higher-than-normal unemployment. The rate at which the labour force is growing and the unskilled nature of much of the unemployment necessitate the application of specific and deliberate policies which can-

not be expected to produce results overnight. Even so, any appreciable increase in economic activity generates a momentum of its own. That of last spring was not strong enough to overcome the impact of the con-

tinent-wide recession which has parsisted throughout the past winter. Now, however, there is strong evidence to suggest that the economy, apart altogether from seasonal factors, is ready to resume its advance.

The special significance of this year's spring upturn, then, is that it can mark the beginning of the end of the recession, provided that public confidence in the immediate future is not undermined.

The proviso is a vital one, for public confidence is the great intangible. To disturb it by playing up the bad and playing down the. good in such a way as to distort the overall economic picture and thus promote fear and doubt where there should be none is to do both Canada and the unemployed a great dis-

"Free Not So

The announcement of a stiff increase in health service charges in Britain serves as a not-so-gentle reminder that that country's much acclaimed "free" national health service is not so free after all.

It never has been, of course. When that a introduced by the Labour government a dozen years ago it was estimated to cost \$356 million a year, in the first year of operation it actually cost \$953 million. Costs have rigen steadily until it now costs about \$1.8 billion

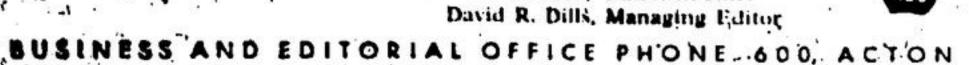

Quote "An educated man is not one whose memory is trained to carry a few dates in history he is one who can accomplish things. A man who cannot think is not an educated man, however many college degrees he may have acquired. Thinking is the hardest work anyone can do which is probably the reason why live have so few thinkers." - Henry Ford .

THE GOOD OLD DAYS

BACK IN 1911

Taken from the luxue of the Free Procs, Thursday, April 18, 1911. About II o'clock last Saturday

morning, little Mary Lasby, the five-venr-old daughter of S. M. Lashy of the Station Rotel, sustained a fractured thigh painful brukes to the head and side, by falling from the balcony of the second storey of the hotel. The little girl was playing there. She fell against a couple of the spindles of the railing, which gave away. She was precinitated to the pavement 10 feet below and was rendered unconsclous. Dr. Ault reduced the fracture and she it progressing fav-

Burglars broke into an Erin store last Tuesday evening and stole suits of clothes and a bag of sugar. Investigation proved the thieves had a sweet tooth as the candy counter was opened and some of the goodies taken

The Guelph Y.M.C.A. campaign ended Monday when, at a banquet tendered to all workers, it was announced the grand total of \$66,935 had been subscribed in one week. The week-long campaign went over the objective set to erect a Y.M.C.A. building in the city.

Assessor Harvey, after a very strenuous six weeks, has completed the assessment roll for 1911 and after summing it is quite satisfied. It totals this year \$447,956 and indicates an added taxation to the municipal treasury amounting to \$400. The assessment this year shows an increase of \$18,186 over last year with the assessment on new buildings erected amounting to \$10,650. The assessor personally visited every property and carefully valuated each one accord-

Mr. John Ritchie has sold his property on the south Lake Ave.—one and a half lots to Mr. Allan G. Smith. Smith will proceed at once with a double cement block house on the property.

Sure signs of spring are the frost going out of the roads in the country and the opening of the trout season in two weeks.

BACK IN 1941

Taken from the lame of the Free Press, Thursday, April 17, 1941.

Rev. Father McBride, who has been pastor of St. Joseph's church, Acton and Holy Cross church, Georgetown, has been appointed pastor of Sacred Heart church, Hamilton and diocesan director of the Catholic Youth Organization.

During his pastorate here, Father MeBride bas made many warm friends in the congregation and community who regret his removal but congratulate him on his advancement to a larger field of activity. Rev. Vincent Morgan of Macton will be. the new pastor in charge of St. loseph's church here.

On Tuesday evening, a numher of friends honored Miss Jean Lambert at a social gathering and miscellaneous shower held at the home of Mrs. William Beavers, Agnes St. Many beautiful and useful pifts-were showered on this popular bride of the month and a most enjoyable soc ial time spent with her.

During the council meeting Tuesday evening, R. M. McDonald was present and tendered his resignation to the Cemetery Board, He also had been told that Messis. Hansen and Hell desired to "resign," Mr. " McDonald pointed out the improvements at the cemetery during the past lew years and stated the members had served without remain-

Reeve Chalmers pointed out council's appreciation of their service, but Mr. McDonald left the past council had not shown appreciation when insurance had been taken' from him and placed elsewhere. He agreed to garry on until a successor was appliented.

The Lorne Scots Regiment has been authorized to mobilize for active service. It is understand the regiment will assume special duties, details of which have not been announced to-date -

Quite a number of the Actin area boys have enlisted for eaching service and the Free Press is continually receiving latters from some of their off triends service. overseas on active lengths.
