

### Ottawa Report

#### Atomic Energy for Peace

By Sandy Best, M.P.

In previous columns, I have written of the activities of the numerous standing and special committees of the House of Commons. Much of the news you read in the press about events in Ottawa is not directly from the House of Commons itself but from one of the committees dealing with a specialized field of government interest.

The special committee on research of which Mr. Amey is chairman has brought forward such interesting matters as the \$24 million pound uranium contract with Great Britain, and an intensive study of Canada's atomic power reactor program, in recent weeks.

The world is constantly hungry for sources of power. In Canada, we have been fortunate in having large supplies of coal, gas and oil, and water resources of great magnitude. Nevertheless, with rapidly increasing industrial potential, southern Ontario, for instance, is examining very closely its sources of power for the future.

Fortunately, Canada has, as well, and largely in the province of Ontario, vast resources of uranium, and the Canadian Government, in cooperation with private industry, has undertaken an ambitious programme to produce commercial electrical power from nuclear reactors.

The first Sinhalese New Testament was published in 1813 and the first complete Bible was printed in Ceylon in 1823. A version prepared by the Church Missionary Society of the British and Foreign Bible Society, a conference was held in Colombo on October 29 and 30, 1960, at which the decision was taken to prepare a new translation. Work has now begun on this project

which it is expected will take 10 years to complete. A gift of \$2,500 towards the cost of the translation has been received from the sons of the late Sir Henry de Mel.

Several showers were held in honor of the former Joyce K. Milbrandt of Kitchener prior to her marriage to George H. Cook of Galt, formerly of the Acton, area on June 3.

### THIS SUNDAY'S Church Calendar

- CHRISTIAN REFORMED CHURCH**  
Rev. J. Nutma, B.A., B.D., Minister  
301 Queen St., Box 44, Phone 688

### Speyside Grade Eight Pupils Expresses Views on Bus Trip

Following a bus trip to prominent places in Toronto last week, grades seven and eight pupils at Speyside Central School were requested to write an essay about their trip. Published in its entirety is the one written by Frank Anthony, which was chosen by the teaching staff.

We then visited the Blue Jays game, including some cannons. In it were also many weapons of World War II. We went into York Mills Bookstore where we saw a machine for making shingles and an oven for heating cannon balls to burn enemy ships.

We arrived at High Park at a quarter to 12. We then had lunch and proceeded to tour the zoo. There we took many pictures of the animals and we next visited the flower garden. They were very beautiful against the hills.

At 10 o'clock, we boarded the bus at nine o'clock. We also saw many old documents. We then moved into a building where we saw the officers' rooms. They had beds with rope in them for springs. They had a fireplace, a trunk and a gadget with which to remove their boots. We then saw the uniforms of the 12 different regiments.

The June meeting of the W. A. of the United Church was held in the church parlor with Mrs. Wilderspin presiding. Roll call was answered with the word Father, as taken from the Bible. Mrs. Cleave led in the devotions, reading Luke 10 and following with prayer and a hymn.

Continued from Page Eight  
so ago in the Fifty Years Ago column that two of the teachers received salaries of \$400 per year for their services on the staff and they were leaving to be married.

When I started to school the First Book was in the room in the old stone school building. There were four rooms in the building built in 1893. By the time I had made their rounds the old stone building was back in use again as a High School. No wonder I notice the changes of today so much.

### United W.A. Gives \$50 To Arena Fund

The meeting closed with the mizpah benediction. Mrs. E. Lambert and her group served a cup of tea.

### G.A.D. About

It was moved by Mrs. Lindsay, seconded by Mrs. Shoemaker that the W. A. give \$50 towards the Acton Community Fund. The next meeting will be at the home of Mrs. R. Brown, June 27. After the business, a picnic lunch will be enjoyed.

### Notes on Nature

By WES FOUNTAIN

**WOODLAND POND**  
A woodland pond is like a miniature world in a goldfish bowl. It presents a package, for virtually everything visible through its transparent surface is engaged in an unending struggle for existence.

The waters of a woodland pond provides home for an astounding variety of animal forms. Many of them spend a major or at least an important part of their life in its waters.

**Much Equipment**  
The physical and mechanical equipment of pond creatures is truly astonishing. There are those who move by jet propulsion.

### NEVER FLY A KITE OR AN AIR-BORNE MODEL NEAR HYDRO LINES

Hydro lines carry electricity at extremely high voltages... up to two thousand times greater than the voltages used in the home. Any model plane or kite enthusiast holding a wire, wire-reinforced string or even a wet string that touches a hydro line can suffer serious injury or loss of life. The danger is increased if part of the airborne object is made of metal.

- REMEMBER these safety rules:
- 1. Always keep to the wide-open spaces... well away from hydro lines and electrical apparatus. Warn others to do so.
- 2. Do not use wire or wire-reinforced string.
- 3. Never try to recover a model or kite that is caught on hydro lines, towers or other electrical apparatus.

PARENTS—Safety education begins at home. Be sure your children follow the above safety rules.
