### NEURITIS

By W. Roy Riddell, D.C.  
Doctor of Chiropractic

Neuritis is a painful inflammation of a nerve, with impairment of power and sensation to the parts supplied by the nerve. The term is most frequently employed when there is an involvement of nerves going to either arm. Sciatica is a neuritis of the sciatic nerve, one of the longest nerves in the body, extending from the small of the back down the entire length of the legs. Of all conditions that respond to Chiropractic, it may be said that neuritis responds most readily to adjustments.
