FAME President Urges Farmers Join New Markettime Enterprise

Several dozen Nassagaweya farmers gathered in Bruckville Community Hall Wednesday evening, November 29, to hear several speakers, including Charles McGinnis, former president of the Ontario Hog Producers and now president of Farmers Allied Meat Enterprises (FAME). The meeting was sponsored by the Nassagaweya Federation of Agriculture.

Archie Service, a Nassagaweya farmer and 2nd Vice President of FAME, was named chairman of the meeting, introducing the speakers and conducting the discussions. Mr. McGinnis stated "We in agriculture are face to face with some serious problems. Farming as a way of life is being threatened. He explained people were attempting to turn farming into strictly a business proposition. "I hope we never get to the stage where farming is a business. The production of food in co-operation with nature is more than a business... it will always maintain its status."

Mr. McGinnis stated, "Farmers down through the years have developed a community life which produces friendship, companionship... this community life is being threatened because of economic conditions. In 1960, Canadian farmers made \$9,000,000 less than they did in 1959, yet the cost of operating was up \$7,000,000 and the people of Canada paid \$162,000,000 more for their food... this is a serious situation and one which cannot be allowed to go on." He mentioned that 50 and more years ago, the average farmer produced enough food for himself and his wife; now the average farmer produces enough for himself, his wife and from 100 to 150 others, yet the standard of living is certainly not improved correspondingly.

The FAME president gave the chief reason which he believes is responsible for the low standard of living of farmers, "We as farm people have been interested in only one thing — producing. We have made little or no investigation into the marketing of our produce... because of this, we are forced to take what the trade will give us for our produce... the trade sets our prices and so our standard of living..."

"It has come to the point where we've got to go a little bit further... you have better than \$20 invested to every \$1 of the other fellow, yet you got less than 40 cents on the dollar while the other fellow got better than 60 cents. How long can this be allowed to go on?... prices are not determined by the laws of supply and demand but by manipulation and price fixing at your expense and that of the consumer. While this is going on... we as farmers are being squeezed out."

"There has been a movement among producers in past months to go into marketing. This is our last chance, our only hope to save agriculture. If we are going to save the family farm, the farm community, we must get into this business of marketing. There are four pressures, keeping prices down: the chain store... the wholesaler... the processor..."

Mr. McGinnis stated, "Farmers down through the years have developed a community life which produces friendship, companionship... this community life is being threatened because of economic conditions. In 1960, Canadian farmers made \$9,000,000 less than they did in 1959, yet the cost of operating was up \$7,000,000 and the people of Canada paid \$162,000,000 more for their food... this is a serious situation and one which cannot be allowed to go on."

and the country buyer. These forces must be overridden." He said that it would be necessary for the farmers to go into marketing in a big way, to build new packing plants across the province and to do this, unite in a financial way. "If we set aside one cent in every dollar of produce, we would have three million dollars a year... we can and should find ways and means."

He informed the audience just what they could expect FAME to do if the farmers did join and enter marketing as suggested. "If we do it, what is FAME going to do for us? The problem is that price levels are too low. The first thing we have to do to change this is to create competition... by being in there and bidding to raise price levels... another great opportunity is the surplus... surpluses are keeping price levels down... we can get in there and handle these surpluses for the benefit of producers rather than the benefit of trade. Surpluses are being used to push prices down when people are going to bed starving. It would pay Canada to give surpluses away and would do much good as well."

In closing Mr. McGinnis asked, "Are we ready to assume the responsibility of our own future? To go ahead and continue to pray to God to give us a harvest, then allow trade to use it for their benefit? It's not so much what we're going to get out of it, but what we can do for mankind, for business, for the farm community... FAME gives us the opportunity to help make this a better world."

When later questioned on contract farming, Mr. McGinnis said that those involved in this are crowding the average producer out of business. He said, "In a few years, either they are going to be in control or we as producers will have control collectively
