# The Vanishing Surname . .

It may be because of the service-club rule about calling fellow-members by their given names or nicknames under penalty of a light fine, or it may be because of the growing informality of modern manners, but the use of surnames in ordinary life is noticeably on the decline. Perfect strangers, after their introduction to each other, will immediately get on a first-name basis. The interviewer on e television program will cell the celebrity he has met for the first time by his given name and expect a reciprocal mark of intimacy.

There are some exceptions to the rule. One cannot imagine the brashest interviewer calling Sir Winston Churchill "Winnie" to his face, although "Good old Winnie" was frequently cheered in that style when he was the inspiration of the world during the last war; and it is doubtful whether anyone has ever dared to address Dr. Schweitzer as "Al." One explanation of the modern custom is

# Rare, but Not hipossible

Without announcing it as formal policy, the federal government included in its June austerity program a cut-back in the civil service payroll. No dismissal of staff was involved, simply a reduction of new hirings. Evidence of the effectiveness of the procedure is found in these figures just released by the Dominion Bureau of Statistics: from July to August the total of departmental emplayees declined by 4,630 to 206,439, and payrolls dropped by \$856,000 to \$73,340,-000. When employees of Crown corporations and egencies were counted in, total

With the introduction of the new Highway we feel the province would be well advised to widen the present highway 25 from Church Street, south to the town limits At the same: time the Highways Department is widening the road it would be an opportune time to install sidewalks in this area.

We would think with the proposed changes on Highway 7 at the eastern approaches"to town it would be a good time to plan for the relocation of the junction of the two highways away from the busy Main-Mill Street corner: A possible solution might be the rerouting of Highway 7 through Acton. In this issue considerable space has been devoted to the subject of conflict of interest involving the 1963 Council. While we do not wish to minimize the seriousness of the charge, we do feel that enough has been said. This week we are carrying the text of the charges made; a councillor's statement;

and two letters to the editor on the subject. It is our aginion that all the pros and cons of the subject have been covered quite adequately. However, it charges are laid in court any subsequent proceedings will be covered as news stories

It would appear to us that the subject is closed unless some texpayer is prepared to lay charges in a court of law to have the matter decided. It is also evident council members are not going to do this, we are not going to do it. It is up to citizens themselves to either da it themselves or forget it.

saves my sanity each winter. That is the certainty that there are several months of exciting even nas of controversial conversation

Every winter I feel sorry for people in lush, tropical counirles. What in the world can they find to talk about? How bored they must become with nothing to mult over but love No wonder they're so emotionally trigger-happy, to prone to revolutions, just to break the monotony. .

We Canadians, besides being the healthiest, happiest, richest best-looking people in the world, are surely also the most loquent conversationalists in exstenco. We are never so destitute of conversational gambits hat we have to fall back on such hackneved themes as art, the soul, love, or man's inhumanity to man. Never.

For six months of the year we discourse brilliantly on fishing, the boat, babies, the cottage, gardening, the car. The last mentioned, of course, appears as often in our dialogue as diety does in that of less favored races.

# High School

It seems that only a few weeks go I was saying "It is good to he back again", and so I say

There is a lot-to-catch up on so without further delay I will get to details. On Thursday, December 20, we

held a Christmas Dance from 9 12 with "Little Caesar and the Consuls" playing. With a gried crowd out the Students' Council made a good profit. Then on Friday afternoon December 21 there was an assembly with the student council Bresident Bonnie MacDougall as M.C. A good time was enjoyed by all and gifts presented to Mr. Hansen, Mr Bevan. McKinnon, Mr. Spielvugel. M. Anderson, Messre Tylera Rr.

Over the Christmas holidays the school hockey team started practice and from what Mr. Coats, the coach and manager taid, we have a very good team this year. Their first game will be Wednesday in Georgetown. There will be a basketball

game for the boys. This is also in Georgetown, also a game here for the girls on Thursday. In semi-playoffs for volleybal for boys Grade 13 beat. Grade \$

A foreigner is buffled and charmed by the sparkling qualily of our colloquy. A Canadian inidwinter, conversation would make Socrates sulk, Plato pout. At the bridge table, cards are forgotten when the conversation begins to bubble like vintbeer is left untouched on the

What, you may ask, is the sence that makes Canadian converse so rich and heady in the winter? Lot's listen in and find out. We'll drop in on a typical January party, in can average home. Where are nuthered beauty and chivalry, fair women and brave men. Typical Canadians, in

Hark to-this young matron, her simple dignity and warmth of countenance scarcely marred by the purple eyelfds and slight double chin. "We like the oll. cuz, y' don't hafta fool with it. Just set 'er and she stays the way y' want 'er. A course, the minit I turn it up a bit, Jim runs over and turns it down. Says I'll ruin us." Giggling.

"Yah, butcha gotta have ! good fan, or she doesn't kick that heat around," says the demure little woman across from ilm. "We like the stoker ourselves. And so it goes. Of course that's only a rough sample of what makes our midwinter conversation so lascinating. Mere words could never convey the intermity of emotion, the nuances of meaning, that emerge in these clashes of wit.

But you needn't talk to me about the brilliant discourses in he salons of 18th century Prance. Tell me not of the sparkling exchanges among the done of Ouford. Just give me any group of red-blooded, furnace-minded Canadians in midwinter, and I'll settle back happily, walting for the opportunity to thrill them with the story of how I almost put in a sawdust-burner one-Win-
