Sunday Collection

Up to 10 Coats Each Money that had been given voung skaters to put in the Sur day collection plate was being

spent in the booth, instead! That's what some parents discovered when they started an invectiontion after reading of the recreation committee's problem of very low income from the Sunday skaters.

The take was more than doubl ed last Sunday as more people realized the problem after roadng about it in the paper. The average that had been about four cents per person went up to 10 cents per. There were about 350 skating and the collection was 135. This comes much closer to overing the costs involved.
