

In Georgetown Now

Mr. Mrs. Syd Hunt Celebrate Fiftieth Wedding Anniversary

Georgetown residents since 1944 and in Stewartstown and Esquimaux before that. Mr. and Mrs. Syd Hunt held open house at 20 Queen St., Georgetown, on Sunday. It was their 50th wedding anniversary.

FIFTY YEARS MARRIED, Mr. and Mrs. Syd Hunt held an open house at their home in Georgetown Sunday. They came from England, and have lived at Bronte, Milton, Esquimaux township and now Georgetown. Many friends extended congratulations. They were married in Combroke, Warwickshire, England.

Bronte, Georgetown, Burnhamthorpe, Guelph, Milton, Oakville, Kitchener, Acton and Campbellville, as well as many from Georgetown and district. There was a handsome anniversary cake and Mrs. Annie Paul of Acton poured tea in the afternoon, and a neighbor, Mrs. William Hyde, in the evening. Grandsons Brian and Philip Hunt assisted in serving the guests.

Mr. Hunt and the former Beatrice Rawlings were married in Combroke, Warwickshire, near Stratford. They lived on a Coventry farm for four years, then Mr. Hunt worked for the railway and served in the army.

Emigrating to Canada, they lived at Bronte and Milton, then moved to Esquimaux, where he managed the fourth line farm now owned by Mrs. Robert Merry. He served with the Lorne Scots Regiment at training camps in Newmarket and Brampton during World War II.

Their daughter Pamela, Mrs. Clifford Paul, lives in Milton and son Gilbert in Brampton. On Monday, Mr. and Mrs. Hunt were pleased to have a visit from Halton M.P.P. George Kerr, who presented them with a government scroll in recognition of the happy occasion.

Largest Canadian meteorite, weighing 366 pounds, was found in 1869 near Iron Creek, Alta., about 70 miles east of Edmonton. The second largest, weighing 370 pounds, was found in 1854 near Madoc, Ont. about 30 miles north of Belleville.

Seek 100-Bed Chronic Wing Addition In Milton to Serve Entire County

A 100 bed chronic wing addition, to serve the whole county, was proposed for Milton District Hospital, to the Halton County Council at a special meeting Monday.

Hospital Board vice-chairman A. Keilly and Administrator John Wilson outlined the proposal, emphasizing that further study would be necessary and it was being suggested so the county could consider the matter.

Mr. Wilson reviewed an investigation of the utilization of beds at the Milton hospital, noting 23 per cent of the patient days were for chronic conditions. The Board had approached the Ontario Hospital Services Commission and was advised 15 beds would meet the needs in Milton but an addition should be delayed until 50 beds were required.

Other hospitals had been approached within the county and Mr. Wilson reported general support for a centrally located chronic unit. Because of its central location, Milton hospital had been proposed as the location. On the basis of county population a 100 bed unit would meet the county needs.

Mr. Wilson told councillors the Board wanted to advise them of the need before proceeding to the Ontario Hospital Services Commission.

Reeve C. A. Martin, Milton,

pointed out the difficulty in having a chronic section in any one location would be in having the doctors as well as the hospitals agreed on the central location before it would be workable. He noted the cost of a chronic care unit would be about \$4,000 a bed while the cost of regular treatment units were \$16,000 to \$18,000 a bed.

Reeve H. Merry, Oakville, suggested he would like to know the percentage of chronic care patients that would be expected from Oakville and Burlington before he would agree that Milton would be a central location.

Even though Milton is central in the county, if the majority come from the south it should be more convenient to that area", he suggested.

Reeve H. Hinton of Acton suggested more information was necessary and a brief should be submitted to all members of the council for study before the county could consider the matter.

The Great Barrier Reef lies off the northeast coast of Australia. It is like a long, irregular wall, 300 to 500 feet high. It is 1,200 miles long, equal to the distance from Miami to Florida. Only small parts of the reef show above the surface of the ocean. The reef provides a protected channel for ships sailing from Brisbane to Cape York.

HARLEY TO HALTON

By Dr. Harry Harley M.P.

During the past week the main item of course has been the budget. The Budget calls for no tax increases although it is expected that the federal deficit will be cut by one third. The Minister recalled that many changes in fiscal and economic policies were included in last year's budget, because we had to move quickly on a number of fronts. The main policy changes have paid off well and will continue to pay off in the months and years ahead. From the economic standpoint, the government's job at this time is to consolidate its gains and plan for steady growth. This has been called a "stand-pat" budget. In a way it is to allow those measures taken in the last Budget to take full effect.

Often discussed in the Budget, and I know of interest to the riding as these were often discussed throughout the riding at election time, were the moves to encourage children to remain in school. As we all know generally speaking the unemployed are the unskilled and the untrained or uneducated. These three moves by the Government will encourage the completion of school courses and keep students at school.

1. Family Allowance of \$10 per month will be paid to children between sixteen and seventeen years who attend school. This is designed to encourage as many teenagers as possible to fit themselves for better jobs. This measure will not cause any increase in taxes. This is looked on as an investment by the Government of Canada in the future of our youth.

2. Part time summer students at university will be allowed to deduct tuition expenses from their income tax. This is similar to deductions claimed by full-time university students. It will encourage, in particular, teachers to further their education at the university level.

3. As mentioned previously loans will be available to university students for their years of study. To be interest free during their studies. These three measures are to encourage education which is the long range cure for unemployment.

45 DIFFERENT MODELS OF CARS

Why one stop at your Chevrolet dealer's is like having your own private auto show

And if we had room here we could go on and on and list all the engines Chevrolet offers, starting at the Chevy II's 4-cylinder (it's the thriftest!) and ranging all the way up to the big Chevrolet's extra-cost 425-horsepower 409 V8 (it's the greatest!). We could wax eloquent about the choice of transmissions, and how they team up with those Chevy power plants to produce some of the going-fast cars ever. Or the fact that you can have unmet different exterior and interior color choices — enough, in fact, to allow some of our lady customers to have the sort of fun in buying and

showing that they generally reserve for shoe stores. And all the models with bucket seats and all the models without — all of them comfortable as all get-out. And the hundreds — yes hundreds — of different extra-cost options... serious ones like Positraction and gay ones like the new AM-FM radio. But all that's best left to your Chevrolet dealer. The long and short of it is, he'll go to any length to show you exactly the kind and size and price of car you want — and exactly how reasonable that price can be for you to be able to enjoy so much more car.

THE GREAT HIGHWAY PERFORMERS — Chevrolet • Chevelle • Chevy II • Corvair • Corvettes
