

Voluntary Check

Have Your Home Inspected for Hazards

Your home is your castle! This tradition is sacred to the program of volunteer home inspection by the fire service. That is why the inspection of any home is subject to the friendly wish of the owner or tenant without involvement of any kind.

If a firefighter knocks at your door let him in. His aim is to help you uncover fire hazards and bring them to your attention.

He will ask to see kitchen, basement, yard.

You can refuse if you wish. If you're wise, you will accept his suggestions, as have hundreds of thousands of Canadians.

Concerns Safety

What he has to say concerns the safety of your home, perhaps your own life. There's no expense to you and it doesn't add to your taxes.

He wears a firefighter's uniform and bears credentials. His shoes are clean. He doesn't call in bad weather so he won't dirty the floor.

He's a person of pleasant personality, carefully selected for the job. If his call is inconvenient, he will leave courteously.

He is at your door either under a planned municipal program—or at your own invitation.

While public and commercial buildings in Canada must submit to a rigid fire inspection, the home and the owner's privacy are respected. Nevertheless it is in the home that three-quarters of all fires occur so often with tragic loss of family life.

More and more across the nation, voluntary or courtesy home inspection has been established as an effective approach to the

problem. While the program is highlighted during Fire Prevention Week, it can apply throughout the year.

Usually, inspectors work in teams down the street, from a fire department vehicle which is always in radio touch with headquarters in the event of emergency. Unless specifically asked, they confine their attention to basement and yard. Besides trash they are alert to storage of flammable liquids and stove ashes, smoke pipes and chimneys, and faulty or frayed wiring. They look for obviously unsafe or doubtful conditions.

They will give you a private and personal written report on

their findings, without use of your name and without gossip about the neighbors. And they will not advise on repairs or equipment suppliers.

TWO-CAR FAMILIES

The Ontario Safety League says there were 1,927,000 passenger cars registered in Ontario in 1963, which is 40.2% of the Canadian total. Production of passenger cars in 1963 was the highest ever, registrations in Canada have increased by 19% in the past 10 years. Canadian households owning two or more cars climbed to 479,000, which is 9.7% of all households. Figures are from the Motor Vehicle Manufacturers.

The Acton Free Press, Thursday, October 1st, 1964 **B5**

All for \$25

Water Pail Puts Out Fire Which Snuffs Out 4 Tots

Would a mother leave small children alone in a closed garage, playing in a car with the motor running? Hardly likely. And yet four tots were asphyxiated by a smoldering fire in a chest of drawers when they were left alone. Smoke brought death to the children in an estimated 45 minutes.

Officials suspected a defective lamp cord as being the trouble. It is grimly ironic that this fire did only \$25 of damage and was quickly extinguished by the fire department using only a bucket of water.

Well done is better than well said.
