Remember last year's heating bill?

Natural Gas will make you smile again.

Does the very thought of last year's home heating bill bring tears to your eyes?

Take heart and look at the low-cost advantages of natural gas heating. A mere glance at the facts will bring a smile to your face.

Fact number one: modern automatic gas heating equipment is remarkably low in cost.

You can actually rent a gas conversion burner for as little as \$2.95 a month, payable on your regular gas bill. Or you can buy a new gas designed furnace for as little as \$3.80 a month—and you can take up to five years to pay if you wish.

Fact number two: natural gas home heating will reduce your fuel costs.

Whether your home has normal or extra-thick insulation, you'll find that your fuel costs are consistently lower with gas than with either liquid fuel or the so-called "flameless" heating system.

Fact number three: no other fuel is as dependable as natural gas. You never have to order gas—it's always there—saving you frayed temper and anxiety. Stormy weather that knocks out power lines and snarls up traffic can never keep natural gas from heating your home.

Over half a million people in southwestern Ontario are already smiling with natural gas. Why not join them?

Call your heating contractor, department store or gas company soon.
