Habits Change

With the changing season comes the need to change our driving attitudes and habits to contend with the different circumstances of earlier dusk and wet, slippery or muddy roads.

Remember that your lights are not as effective when covered by mud. Tail lights should also be kept clean to make your brake lights visible to the cars behind. And don't forget that it takes longer to stop on muddy or frosty roads than it did during the summer.

JUST ONCE
The best way to remember your wife's birthday is to forget it ONCE.
