### Lot's Play Bridge

By Bill Coats

One aspect of the game of bridge that is little understood by the average bridge player is sacrifice bidding. There is a good reason for this. At rubber bridge, although sacrifice bidding has a place, it is not as obvious as it is at duplicate bridge.

What is sacrifice bidding? Suppose the opponents are vulnerable and have just bid six spades. You are sure that they can make this contract. If you do nothing, they will score 750 points for the slam and 180 points for six spades. This is a total of 930 points plus what they take for the rubber. If you bid seven diamonds, get doubled and go down four tricks, you will lose 700 points. Actually, however, you have gained 230 points. Unfortunately, the opponents are still vulnerable, so you cannot claim points there.

At duplicate bridge, each hand is scored on its own. Vulnerability is not carried from hand to hand. Hence, when sacrificing, you can also include the bonus for vulnerability. A good example of this occurred last week at the Acton Bridge Club.

Board No. 5:  
Dealer — North.  
North — South vulnerable.

North		
S-K Q		
H-A J 9 8 5 4		
D-J 8		
C-10 3 2		
West		
S-0 7 5 4 3		East
H-7 6		H-1 3
D-0 5 4		D-A 9 7 6 2
C-A O 5		C-K Q 8 6
South		
S-A 10 6		
H-K Q 10 2		
D-K 10 3		
C-J 7 4		

The bidding:  
North Pass South West  
3H Pass 1H Pass  
3NT 3NT 4H 4S  
Pass Pass Dble. All Pass

As you look over the hand, I'm sure that you will realize that four hearts can be set. However, this hand was played at four hearts three times and every declarer made his contract. It is most difficult for West or East to lead clubs early in the game.

When North jumps to three hearts, East suspects that they will go to game and prepares for a sacrifice. His 3 no trump bid is called the unusual no trump. It requests partner to bid his best minor suit. Over four hearts, however, West can bid spades and East, with a tolerance for spades, can leave it in.

If South is allowed to play four hearts and if he makes it, he will score 620 points. West's four spade contract, doubled, was set only two tricks. This was 300 points to North - South and quite a profitable sacrifice for East - West.

This week's winners were: first, Glenn Banks, Duke Wilson; second, Mrs. Marion Hunter, Mrs. Frances McOut; third, Mrs. Sue Sullivan, Mrs. Barb McCullough.

The best way to save face is to keep the lower end of it closed.

Farmer to farmer sales increase every year, especially of wet corn where suitable storage is available. This kind of corn can be a poor buy at any price unless it is fully matured at harvest. Every 100 pounds of matured ear corn commonly produces 82 pounds of shelled corn. The amount of kernel in immature corn is much less.

692 lbs. of ear corn are required to yield 56 lbs. of one bushel of shelled corn at 15% kernel moisture. However, if the kernel moisture of the corn you are buying or selling is 30% kernel moisture, you require 892 lbs. of ear corn to provide the equivalent amount.

Corn shrinks when dried. To compare the value of wet corn with that of dry corn, you must know the percentage kernel moisture and take this shrinkage into consideration.

A country resident declares there has been frost every single month this year — summer included. And he knew the dates.

The sudden snowfall at noon Wednesday thrilled the youngsters returning to school. Many were seen catching the huge flakes.

Remember last year's heating bill?

Natural Gas will make you smile again.

Does the very thought of last year's home heating bill bring tears to your eyes? Take heart and look at the low-cost advantages of natural gas heating. A mere glance at the facts will bring a smile to your face.

**Fact number one:** modern automatic gas heating equipment is remarkably low in cost. You can actually rent a gas conversion burner for as little as \$2.95 a month, payable on your regular gas bill. Or you can buy a new gas designed furnace for as little as \$3.80 a month — and you can take up to five years to pay if you wish.

**Fact number two:** natural gas home heating will reduce your fuel costs. Whether your home has normal or extra-thick insulation, you'll find that your fuel costs are consistently lower with gas than with either liquid fuel or the so-called "flameless" heating system.

**Fact number three:** no other fuel is as dependable as natural gas. You never have to order gas — it's always there — saving you frayed temper and anxiety. Stormy weather that knocks out power lines and snarls up traffic can never keep natural gas from heating your home.

Over half a million people in southwestern Ontario are already smiling with natural gas. Why not join them? Call your heating contractor, department store or gas company soon.
