Did you ever notice the number of drivers, who just use the parking lights, when it starts to get dusk? This is not only useless, but illegal. Sure there is a period between daylight and dark, when your lights are not much good to you. But they are good for the other driver! He can see your headlights, so he knows you are on the road, coming his way, but he cannot see your parking lights. Give him a break — and drive legally.
