TOTS AND THE TELEPHONE
An Acton area parent knows the magic that the telephone holds for children. Learning to use the telephone properly, like learning to do many other things in the home, can be taught with a little pre-planning. Here are a few tips to help your youngsters use the phone correctly and courteously.
1. Make It Fun to Learn: Teach your child how to answer the telephone promptly and in a friendly way.
2. Make a Few Basic Rules — (and stick to them!) Explain to the children that their calls should be brief, that they should speak directly into the mouthpiece (and not shout), and that the receiver should be put down gently.
3. Practice Makes Perfect: Let your child call a friend, grandma or other special relative under your supervision.
Using the telephone can build a child's confidence, expand his social graces, and help him communicate effectively. It's magic, can also be used advantageously to help instill in children those qualities of respect and responsibility that will ultimately mark them as mature adults.

Acton's new telephone directory will be going to press shortly, so please check your listing. Is your name spelled correctly? And what about your address and phone number? Have you thought about additional listings? Other members of your family and relatives, roomers or boarders would benefit from having their names listed in the telephone book. If you're a businessman, you can use extra listings to show other firm names for your business — to associate your name and residence telephone number with your firm name — or to show after-hour numbers for you and your key employees. Remember, extra listings, at little cost, make it easier for people to find you. FOR ANY CHANGES IN YOUR LISTING, OR ANY ADDITIONS, CALL OUR BUSINESS OFFICE WITHOUT DELAY.

CLEANING PROBLEM?
Occasionally, the question arises as to the best way to clean a telephone. The answer is quite simple: a damp cloth keeps any phone clean and shining. Never clean your telephone with soap and water, as water may penetrate into the set and put your service out of order.
Incidentally, the outer plastic shell doesn't require any special waxes or polishes — it's "self-shining!"
