# Mother and Daughter Banquet Enjoyed by Brownies, Guides

Over 190 Mothers and Daughters observed the birthday of the founder of the Scout Movement in Canada Thursday evening of last week during a banquet at the Legion Hall.

Due to the fact no Boy/Scout Troop is active in town, the name "Boy Scout Week" was changed here to "Girl Guide Week". Guides and Brownies in their attractive uniforms were accompanied by mothers to enjoy a turkey dinner and see a film, shown by All Long, entitled "This Wonderful World".

Guiders, assisted by several mothers, cooked the meal which was served by members of Acton Legion Ladies' Auxiliary assisted by some of the Guides.

Last minute changes were necessary and a complete program planned for the banquet was cancelled due to the Music Night being sponsored by the M. Z. Bennett school. Many Guides and Brownies attending the school left the banquet early to take part in the school program.

Mrs. J. Lowrie, captain of the second Acton Guide Company, was master of ceremonies for the evening and introduced the head table guests, Mrs. I. Presgrave, Deputy Division Commis-

See those giant wide doors? Handi-Van is easy to load and unload. Two curbside doors may be specified, and then there are a number of extra window combinations available.

Handi-Van can turn in a 35.5 foot circle. Lets you scoot out of packed traffic and deliver your goods where and when you promised.

Look at all the space. Handi-Van measures 211 cu. ft. inside. That will hold up to a ton of payload. Loadspace length from engine housing back is over 92 inches.

The engine is a 120-hp engineering gem. And if you want more muscle, you can specify a 140-hp work horse. Powerglides is a reliable too.

The metal floor is built to shrug off abuse from most any kind of load. In fact, it's a heavy duty floor at no extra cost.

Handi-Van's body and frame are unitized. And the heavy-gauge steel has extra resistance to corrosion, giving you longer service.

**You can see how great Handi-Van is from the back. But the most important thing is on the front.**

It's that GMC nameplate that makes the difference. Not the plate itself of course, but what it represents. GMC has a reputation for Engineering Leadership. For instance: realizing most Handi-Vans would be city-operated and subject to road moisture and salt, GMC engineers started at the bottom. Sheet metal in exposed areas is first galvanized, then covered with aluminum paint, phosphated... then, after all that, undercoated! No wonder Handi-Van stands up so well under the worst a Canadian winter has to offer. And no wonder GMC has earned that reputation for leadership. When you're thinking vans—think Handi-Van by GMC.
