by bill coats

Modern bidding is much more competitive than it used to be. A good bridge player doesn't sit back just because the opponents have the best of the cards. This means that a number of idle bids have been put to use as competitive devices.

Take a look at this bidding sequence:

West	North	East	South
1H	Pass	2H	Pass
Pass	2NT		

The meaning of North's reopening bid of 2 no trump can be determined by a process of elimination:

(1) North cannot have a strong balanced no trump hand. If North held 16 points or more, he would have taken some action over the one heart bid.

(2) Since North's bid cannot be natural, it must be a take-out bid of some kind. If North had support for all the unbid suits, he could make a take-out double. Since he didn't, just which suits can North have?

(3) If North's bid is for take-out, it must be with support for two suits. But if one of these suits is spades, why bid 2 no trump, which makes it impossible to bid 2 spades? In short, the 2 no trump announces a weak reopening hand with support for either minor.

North's hand might be:  
S-X  
H-X-X  
D-Q J 10 X X  
C-K J 10 X X

Here is another example of a bidding sequence:

North	East	South	West
Pass	Pass	Pass	1S
1NT			

Normally, an overall of 1 no trump shows a balanced hand with 16 to 18 points. But how can this be so? North passed originally. North's no trump bid is a take-out bid. If he had three suits for take-out, he could double. Hence the no trump take-out is special and shows just two suits — clubs and diamonds.

In both these examples, we have shown examples of the "unusual no trump". This is a special take-out bid which calls for partner to bid his best minor suit.

Now this may cause the partner some concern. His best minor suit may not be very good, but he still asked to bid his best minor. Here is an example of the unusual no trump in action.

South's no trump bid is the unusual no trump. He doesn't want the opponents to play quietly at 2 hearts. His competitive bidding forces the opponents to 3 hearts.

Notice that North - South can make 3 diamonds. It looks like East - West can make 3 hearts, but just remember — it's a lot harder at the bridge table, where you cannot see the opponents' hands.

Last week's winners were: first, Kay Harmer and George Soltz; second, Mrs. L. Potter and Pat Jeffares; third, Jack Coats and Bill Coats.

**FIRE WARNING TO MOTHERS**

Two of the most destructive fire hazards in Ontario homes are the careless use and storage of inflammable liquids, and the ignition of cooking fats and oils.

**INFLAMMABLE LIQUIDS**—Kerosene, paint, gasoline, naphtha and some cleaning fluids give off highly inflammable vapours; they should be used with caution and carefully stored. Keep a carbon dioxide, foam or dry chemical fire extinguisher near their storage area. Oily rags left in cupboards or corners can burst into flames spontaneously. Dispose of them immediately after use.

**COOKING-FAT FIRES IN THE KITCHEN**—You can reduce the danger of grease fires by keeping your stove clean. Don't let splattered fats build up. Don't leave hot frying-pans unattended. A grease fire can be extinguished with baking soda or smothered with a lid. Keep both handy whenever you're frying.
