your daughter is throwing a giggling, chattering, swinging, vibrating pajama party in the basement game room. they'll all take showers. no one will get caught cold.

want to know why?

You've got a very efficient automatic gas water heater. No one knows it's there, even when a whole gang of girls decide to take showers and wash their hair and use hot water for all the countless things girls use it for. Then you thank heaven for it.

Natural Gas recovers hot water so fast you can handle the whole gang. Because gas goes to work instantly. There's no wait-up time for a gas flame. It's as hot as it can possibly get the second it's needed. So, the faster the heat, the faster your water heats up. And that's why your gas water heater delivers hot water at such an exceptionally fast rate. With a gas water heater, no one gets caught cold.

So go ahead. Live it up... with all the hot water you can splash in. You can buy or rent an automatic gas water heater. See your plumber dealer, department store, or gas company.

## UNITED GAS

With natural gas, you can take hot water for granted.
