Hydro strikes \$37,929.29 budget

Acton hydro electric commission struck a capital expenditure budget of \$37,929.29 at their regular bi-monthly meeting Thursday although some commissioners felt they might be under budgetting.

Chairman Ted Tyler told the meeting they can always go back for more money in the

event it's needed. The possibility more capital might be needed was broached when superintendent Doug Mason said maintenance was needed on present equipment. He explained he didn't include estimates in his budget because he was waiting to see the direction council was tak-

ing on newly planned areas. Mayor Duby agreed... "I realized just since Tuesday, 43 building permits have been is-

sued in this town." "Every indication points to considerably more residential development than we've had in recent years," he warned the commission.

Building has already started in Lakeview subdivision and the superintendent has had requests from contractors for poles for temporary services. An arrangement with the Bell Telephone Co. was pending to use their poles.

Eartier in the meeting, commissioner Doug Dawkins questioned who gave contractors permission to install one set of stop lights on a dead end pole owned by Acton Hydro at the corner of Mill and Main. The question met with a round-thetable shrug. Mr. Dawkins said it was bad enough installation was done without permission, but the lights were hanging cockeyed, too!

Chairman Bob Drinkwalter switched the topic to garbage disposal and incinerators with reference to the Acton dump, which is almost full, with no alternative site available. He outlined Acton's intention to

purchase an incinerator. Milton councillor Brian Best said it was possible the incinerator in mind might not pass new air pollution control laws. Regulation of the burner would be difficult because of the variety of garbage.

The chairman said the burner is being used in Quebec with some success. In the demonstration shown Acton councillors, the burner consumed three or four tons of garbage in 20 minutes, leaving only tin cans and ashes to be buried.

Georgetown representatives Reeve Hunter and Councillor Emmerson figured Georgetown still had four or five years left in their present dump, which uses the land fill method. Milton representatives wondered about the merits of the incinerator method which would require a new site. The present Milton dump is in a highly resi-

Acton's problem is accute. We've only got two or three months left," said the mayor. "Sooner or later," said Milton's Brian Best, "every service is going to be centralized." The northern municipalities are going to find it cheaper and more expedient

he suggested. Councillor Tony Cousens of Milton felt municipalities could co-operate on a more extensive scale and include Nassagaweya and Esquesing in the discussions. He asked if there

SUICIDE FINDINGS

Contrary to popular opinion, suicide is not always preceded by visible gloom or dejection. Psychiatrists working at suicide prevention centers have discovered that attempts by patients to take their own lives frequently are preceded by "smiling depression" - a covering - up of inner fears of farlings with an air of good humor. "Once the suicide has made up his mind to take his life, he may suddenly seem relaxed, even happy and relieved, because he has decided a way out of his agony," according to Dr. Robert E. Litman of the Los Angeles Suicide Prevention Center.

Elders receive rally pep talk

"The church may not have too long to witness," was the warning voice of George Fer-1 nic, 30 years an elder of a Toronto Presbyterian church and presently Assistant Director of Presbyterian Men, at a rally of elders from the Presbytery of Brampton of the Presbyterian Church in Canada. Almost all congregations were represented at the enthusiastic meeting held in St. Andrew's Church, Brampton, on Sunday evening. April 9.

Mr. Fermie pointed out that Communism is 50 years old this year and already eight million subscribe to its beliefs. "The world will only be convinced when we as elders and a church present something to the world by which it will be attracted," he insisted. "Canwe not show the joy and power of a life dedicated to the ser-

vice of the Master?" Speaking in the theme, "Help, I'm an Elder!" he outlined briefly the history of the eldership from the time of Moses discussed the duties of elders, which include government and discipline in the church to maintain the "family" in a wholesome way, the admission of members, the conduct of worship and the training of the young.

Referring to the number of men relinquishing the ministry, he challenged his hearers that many were discouraged by the attitude of their sessions and some even dreaded bringing new members into the church, because they were afraid of bringing them into the arms of a corpse.

He pointed out that there is one minister to every 18 elders in Brampton Presbytery to show that the whole load can not be borne by the minister. He added that elders can get to places and make contacts that the minister cannot. "What is the gospel according to you?" Mr. Fernie asked.

A panel discussion on practi-Certificates for centennial cal questions of the eldership followed. Panelists included Rev. R. MacMillan, Knox Oakville; Rev. D. R. Micholson, Campbellville; William Wright an elder from Port Credit; and Mr. Fernie. The convener of the Presbytery's Evangelism and Social Action committee, Rev. D. Gibson, Orangeville, moderated. Song leader was Jim Lain of Hamilton. The Male Quartette of Knox, Mil-

ton, brought messages in song. Amongst the elders was one lady, Miss Mary Whale, of Eradjudicator and supervising indale Church, elected to the eldership since the General Assembly's historic approval of the ordination of women last June. She is director of Overseas Missions of the Women's Missionary Society (W.D.).

Centennial project

Suggest Spring clean-up to make home fire-safe

For those who don't have a 1967 centennial project underway right now, Halton County Fire Prevention Bureau has an

"Make a spring clean-up your own personal centennial project for 1967," The Bureau suggests on 10,000 clean-up posters its member fire departments are distributing.

The new posters going out to home and business places in Oakville, Milton, Acton, Georgetown and the North Halton townships of Esquesing and Nassagaweya should prompt homeowners to dig into the project with gusto, the Bureau hopes. Artwork on the posters includes a picture of a firefighter pointing to the heading, "Carelessness Costs Dollars" and a large replica of Canada's centennial symbol.

"Check your home - prevent fires," the posters urge. "Remember, every fire call is an expense to your community."

What's the value of a Spring clean-up at your home? The Bureau points out that many homes are filled with fire hazards every Spring, following

the winter's accumulation o rubbish. Go through your home from attic to basement (don't forget the garage) and get rid of anything you no longer need. Make your home more fire-safe with a Spring clean-up, members said, and there is a good chance your home will still be around when Canada cele-

brates her second centennial. The Bureau cautions against open bonfires and grass fires. If incinerators are allowed under your community's by-laws, make sure yours is equipped with a lid and that someone is there to watch it, in case embers spread to grass or nearby buildings.

The Bureau does not recomend burning dead grass at this time of year. It's too dangerous when the grass is so dry.

After a heavy winter's use, your furnace should be cleaned and checked over by a reliable serviceman. Make sure no stovepipes touch walls or partitions. Store flammable liquids in safety-approved storage cans and check your fire extinguish-
