

A residential building boom started this spring in Lakeshore subdivision. Initial erection is 50 homes.

Look into crystal ball

Parks, recreation expansion in Acton

Can you visualize a park stretching from the board hall on Wallace Ave., following the course of the school creek all the way to Fairy Lake?

A ball dreamed has been constructed and the board hopes residents will be able to use the park as the present Prospect Park is used both as a pleasant garden spot and for recreation. The program of developing the park was conceived by Glenka park was conceived by the previous park board. It is interesting to note the board hoped to hold an official opening in conjunction with Acton's centennial celebration this year.

This year for the first time Action scrapped the previous two board — recreation committee and board of parks management — system of running recreation and parks. It is a new system of two boards with the same job but they are composed of the same members.

It is expected many of the low spots will be filled by the late of the summer. After the job is done the committee will have a much clearer idea of what they can do. Present facilities include a wading pool, a beach on the lake which has just been renovated, diamonds for baseball, softball under lights and the community centre which houses diverse activities like roller skating, lacrosse, dancing, movies, wrestling, shows and of course hockey. Curling and skating from October to May. There are excellent facilities for its fishing.

When Art Cooper resigned as secretary-treasurer the board(s) were fortunate to secure Harold Old's wife, Doris, to take the reins. This giving a man and wife team the job of running the park and recreation.

The park has also been the home of Acton Fall Fair since 1913 and this the centennial year is going to be a four day extravaganza which will be the hub of Acton's centennial celebrations.

Chairman Goy estimates it only costs residents of Acton about two dollars per capita per year for this extensive recreation program. This figure is based in a survey over the past six years and Mr. Goy feels the cost is well worth it.

These renovations will likely be a two stage development, half done one year and the rest the next. This year an engineer has been engaged to draw up plans and specifications for the work.

Chairman Goy freely admits the new system is an experiment but he has every hope it will be a success.

Back to the park program, the board expects the board will be in session in the next year and Mr. Goy feels the cost is well worth it.

JOHN GOY
Chairman

The green belt visualized by chairman Goy from Fairy Lake to the board hall. It could be a reality but these projects are only in the planning stages. The idea is there and it will take cooperation from many groups to make it a reality.

A.P. GREEN REFRACTORIES
(CANADA) LTD.

ACTON, ONTARIO

CANADA'S MOST COMPLETE REFRACTORY SERVICE

MICRO PLASTIC ESTABLISHED IN 1945 and expanding rapidly

- **1945** - MICRO PLASTICS LIMITED WAS FOUNDED IN ACTON TO MANUFACTURE ALL KINDS OF PLASTIC EXTRUSIONS AND WAS THE FIRST COMPANY IN CANADA TO MAKE SUCH PRODUCTS.
- **1955** - A NEW BUILDING WAS ERECTED ON MAIN STREET N. MANY NEW CHANGES BEGAN, INCLUDING THE PURCHASE OF AND MOVING OF EXTRUDERS FROM THE OLD SITE TO NEW BUILDING.
- **1961** - BUILDING PRODUCTS PURCHASED THE BUSINESS AND INTRODUCED THE MANUFACTURE OF POLYVINYL CHLORIDE (P.V.C.) PIPE BEGAN.
- **1965** - IMPERIAL OIL LTD. PURCHASED THE BUSINESS AND SINCE THAT TIME EXPANSION AND INTRODUCTION OF NEW PRODUCTS HAS BEEN RAPID.

Pipe Manufacturing Plants are also located in Edmonton, Alberta and Hamilton, Ont.

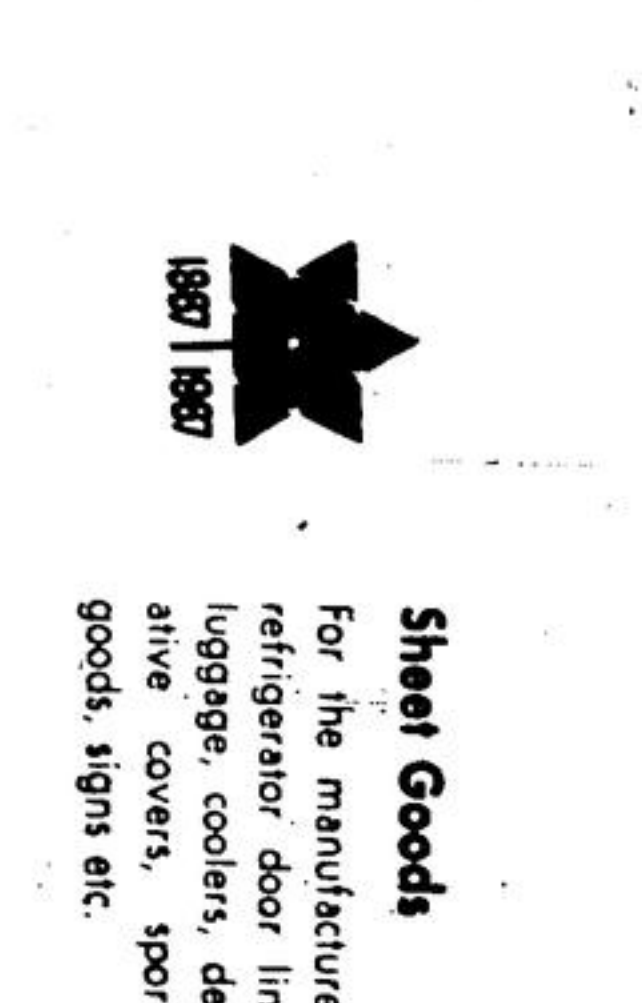

Custom Profiles
Window channels, breaker strips for refrigerators and intermediate products associated with the building and domestic appliance industries.

Pipe
PVC and Polyethylene pipe for drain, waste, and vent, pressure, sewage, conduit, gas pipe, irrigation, etc.

Lighting Panels
Custom color designs for lighting displays, etc.

Sheet Goods
For the manufacture of refrigerator door liners, luggage, coolers, decorative covers, sporting goods, signs etc.

Moulded Fittings
Mainly for pressure pipe, drain waste and vent, pipe couplings, etc.

Pipe & Micro Plastics
DIVISION OF
BUILDING PRODUCTS
OF CANADA
