

Same style

In this land of four seasons our food naturally changes to suit the season just as do our clothes. During the coldest months of the year, hot, fairly heavy food is what we want while in the heat of summer we relish something light and cool. Irrespective of the season the daily meals must not only satisfy taste and appetite but be adequate nutritionally as well. Fortunately most foods have about the same food value whether eaten hot or cold. For good summer eating meats can be served cold in many ways with potato chips and salads.

YOUNG CANADIANS

One out of every three people, or more than six and a half million Canadians are under the age of 15. Of these, the National Safety League of Canada, predict that more than 2,000 Canadian children under the age of 15, are condemned to die from accidents. They will be electrocuted, suffocated, burned, poisoned, drowned or run over at the rate of seven per day. Further, some half-million children will be injured—some disfigured or crippled for life.

FASTER LANGUAGE LEARNING

The new language laboratory, Tutor S.A., Geneva, Switzerland, is a scientific aid for foreign adults who must acquire an accurate knowledge of spoken French in the briefest possible time. No books are used, but the first stage of a two-stage course is audio-visual. Students are shown a film or group of slides reading with various occurrences which might arise in the course of a typical day in Geneva. The film is accompanied by a tape connecting the conversation with the situation on the screen. In the second stage, the student is placed in a soundproof room where he can practice the phrases he has learned without fear of disturbing or being overheard by other students. At the end of a 200 hour, six to eight week course, the student can acquire a vocabulary of 2,000 words and conduct a conversation in the language.

Survey food shopping habits Canuck women

Where the store is and what is on its shelves are more important than low prices to women going shopping each week to replenish the household larder.

As a result of the recent Ottawa hearings on consumer prices, the editors of Canadian Grocer asked housewives in Edmonton, Toronto and Montreal (French and English) a series of questions on where they do their food shopping and why. Most women shop at two stores a week. In Edmonton and Montreal (English) 42 per cent of all homemakers shop at two stores a week and in Toronto and Montreal (French), it's 32 per cent.

The next largest group shop in three stores weekly. The one-store shoppers account for 90 per cent of the trade; independents get less than 10 per cent. Most women (60 - 65 per cent) shop at their favorite store once a week; from 20 to 34 per cent shop there more than once a week. From 35 to 50 per cent of

the women stick with one store only; from 45 to 65 per cent may do their main weekly shopping at some other supermarket or independent store once during the month.

In 20 to 25 per cent of cases, women chose their first-choice store for the convenience of its location. "Best variety" is more important (12.5 per cent) than "lower prices" (10 per cent). With 9.5 per cent it's "I prefer
