We Cordially Invite You to Come and Browse

Bulova Accutron*. First watch ever to guarantee accuracy!

In the Bulova Accutron timepiece all the parts that make a watch fast or slow have been left out. You'll find no balance wheel, no mainspring at all. Bulova Accutron time is kept by the vibrations of an electronically controlled tuning fork. It divides each second into 360 equal parts. And we guarantee accuracy within a minute a month. Or about 2 seconds a day. No wonder Bulova Accutron has been chosen to time the first U.S. astronauts on the moon.
