Natural gas is exciting

at the Windsor Raceway.
Ever watch the trotters going through their paces down at the Windsor Raceway? What with the speed, the colour, the excitement, you may never have noticed that you stay completely comfortable. But you do. They've gone out of their way to ensure your comfort, winter or summer—and they've done it with natural gas. From the clean, fresh air you breathe, to the goodies on your dinner table, natural gas behind the scenes is quietly contributing to your comfort. In fact, the things that gas is doing at the Windsor Raceway can be as exciting to a home-owner as the race itself!

Look at the big Grandstand windows: Natural gas keeps the big 6,000 seat grandstand warmed with clean, filtered fresh air. The windows stay clean and dry whatever the weather, because the gas heating system doesn't allow soot or frost build-up. No condensation can take place—because gas-heated warm air literally "scrubs" it off!

Peek at the modern Kitchens: They're fully equipped with natural gas appliances. The chefs prefer them for speed, precision, economy. Most chefs do, as a matter of fact. Think of it this way: gourmet meals are easier to make with natural gas for cooking.

Glance at the Taps: From grandstand to stables to paddock natural gas heaters maintain an unlimited supply of piping hot water—gallon after gallon of it! Your home calls for only a fraction as much, of course—but gas will give you the same speed and dependability.

Windsor Raceway, like so many big complexes in South-Western Ontario, chose natural gas because only natural gas does so many things so well—efficiently, economically, dependably. And natural gas can do as much for you. Look into it. Talk to your contractor or United Gas.
