

250 district cubs enjoy day's program at Georgetown

A well-organized cubaree last Saturday drew about 250 district cubs for a "terrific" day's program. The Acton A pack attended, divided into two groups led by cub leader Mrs. Jordan and two venturers, Sam Schoonop and Bruce Fowler.

The purpose of the day was for competitions in cubbing, and all events were run by Scouters. Cubs who weren't taking part acted as cheering section for the others.

Events included balloon throw, bucket race, pyramid, Kim's game, soccer, scavenger hunt, tent pitching, baseball throw and tug-of-war. One highlight was the tent pitching pie eating contest, when the boys attacked the pies with their hands behind their backs. There was more pie on the boys than in the boys, one leader commented.

Ribbons were presented at the day's end and according to the number of points received each group received camping equipment in lieu of trophies. Top team of the day was the 3rd Georgetown pack.

Darlene Barrager presented a gift to Assistant district commissioner Mrs. Don Price-Jones who helped as cook for the district camp.

Kenny Diamond of the 5th Georgetown B pack received a silver dollar and crest for designing the winning cubaree badge.

Organizers of the program were Roger Clark and Miss Barbara Youmans of the 8th Georgetown pack. It lasted from 9 to 4 in Cedarvale Centennial park.

OUR READERS WRITE:

EVOLUTION THEORIES UNACCEPTABLE!

61 Charles St., Georgetown.

Dear Mr. Editor:

I wish to bring to the public attention, a very unjust situation in our society. I am just a housewife and mother of three children and my education leaves a lot to be desired. Still I think it is my duty to let you in on what bothers me and a lot of other parents and taxpayers.

All of us are hard working people with families. We would all like to give our children an education that is going to open doors to a challenging and worthwhile future. Besides the regular school hours we would like to give them music lessons, let them join a figure skating club, etc.

But we have one drawback, which takes away all these extra things which so many people take for granted. We are Christians who believe that God made the heaven and earth. We believe that God created the sun, moon, stars and other bodies in the universe. We believe that God created every living thing in nature, including Adam and Eve and thus the whole human race.

This is why we sent our children to the Christian School. Not because we feel our children are better than the public school children. But we can't really believe that God is the Creator of things, and have the whole public school system moved into them the evolutionary theory.

Science, for example, teaches us that we are descendants of apes, this is unacceptable to us and very anti-Christian. Yet it is supported by our government. Because we are Christians with strong anti-evolutionistic beliefs we are forced to pay taxes for the public school system, while our children do not attend the said school. We have to build our own school buildings—pay our own teaching staff—and the transportation of our children.

This is a great financial burden, and I feel this is a great injustice done to Canadian citizens who love this great country, who try to teach their children to be good citizens, and good Christians too.

Mrs. Alice Keen.
