It is so difficult to strength a weak stomach if one goes at it correctly. And this is true of the Heart and Kidneys. The old fashioned way of doing the stomach or stimulating the Heart or Kidneys is surely wrong! Dr. Sloop's pointed out this error. "Go to the weak or alling nerves of these organs," said he. Each little organ has its controlling or "handle nerve." When these nerves fall these organs must surely follow. This vital truth is leading druggists everywhere to dispense and recommend Dr. Sloop's Remedy. A few days test will surely tell! Sold by E. J. Scott.

Read the pain formula on the box of Pink Pain Tablets. Then ask your Doctor if there is a better one. Pain means congestion—blood pressure somewhere. Dr. Sloop's Pink Pain Tablets chase heat pains, womanly pains, pain anywhere. Try one, and see! 20 for 25c. Sold by E. J. Scott.

**THE PRESENT INSTANT.**

Science Defines It as the Hundredth Part of a Second.  
A congress of European astronomers decided that the present time—that is, the present moment at any particular instant—consists of the hundredth part of a second. This has been settled on because these men of science have decided that it represented the smallest fraction of time which could be appreciated by the human brain. Yet the thousandth part of a second is actually used in physics and especially in the study of electricity.

Spelled His Act.  
A musical artist announced to his friends that he had a feature for his act that was calculated to make the whole profession sit up and take notice. Several days later he was asked to divide his plans with the manager. "Oh, that's all right," was the answer. "Well, if it was such a wonderful thing, what was it?" was the general inquiry.

A Closed Discussion.  
They had strolled along in a friendly way, and the man in the hat was asking the man in the suit about his work. "Oh, that's all right," was the answer. "Well, if it was such a wonderful thing, what was it?" was the general inquiry.

A Fair Blood Test.  
The gentleman was strolling across a large estate when he came upon a man fishing. "What sort of fish do you catch here?" he asked.

Divides the Waters.  
Sitting exactly at the highest point of the divide of the Rocky mountains, on the Great West division of the Canadian Pacific railway, is British Columbia, is a hotel. When it rains in the mountains the water which falls on the eastern slope of the hotel roof trickles away to join a tiny stream, which in due time mingles its waters with the Atlantic. The water falling from the mountain on the other side of the roof, flows westerly and ultimately into the Pacific.

**A LIVING SNUFFBOX.**  
Pauillac Rets Mme. de Coya Placed For Louis XVIII.  
There have been snuffboxes of gold studded with jewels, of delicately carved ivory, mother-of-pearl, horn, wood and tin, but there is only one living snuffbox on record, and that was the particular luxury of Louis XVIII. of France.

**ANTIQUITY OF CHEESE.**  
Homer and the Book of Job Allude to the Cheese.  
Cheese and curdling of the milk are mentioned in the book of Job. David was sent by his father, King Achish, to watch the flocks of sheep on the top of the mountain of Gath. The gift of "cheese of the mountain" was given to David's army at Mahabane during the rebellion of Abimelech.

**The News by Windmill.**  
In certain parts of Holland birth, marriage and death are frequently announced by the windmills instead of in the newspapers. When a miller gets married the mill will mill the arms of the wheel in an oblique position and with the sails unfurled. His friends and guests often do likewise with their mills in token of ceremony. To indicate a birth the wheel is stopped with the arms in a standing position, but at a more acute angle than for a marriage and with the two upper sails unfurled. Should a miller die the arms of his mill are left until after the funeral has taken place.

**Eleven is a Good Number**  
In early Victorian times the woman was accustomed to rough it. Isabelle Pyrie Mayo in her "Recollections" says that one day she had a party of eleven. She had eleven of her own bakers—patronized by royalty—kept eleven men and had only one dog for them all. During the twenty-four hours they occupied it turned out that eleven of the men were in the party for generosity by his yearly subscription to his funds.
