W. H. FOSTER

· Watch Expert and Jeweler Though he is still quite a young man, Mr. Foster has had years of experience in watch making and the jewelry business. After spending his hoyhood days in Brampton, his birthplace, he entered the establishment of Mesers. Gunther & Co., manufacturing jewelers, Toronto. Here he spent seven years to good advantage, and obtained an expert knowledge of the actual making of watches that has fitted him for the fine watch repairing that he now makes a specialty of. He was a member of the firm of Savage & Co., Quelph, for five years, and came from that city to Georgetown in May, 1913, to start in business for himself. He has since occupied Wilson's old Stand on the west side of Main St., and has met with great success. The store fittings are new and handsome. and an extensive stock of watches. jewlry, standard silver and plated ware, is carried. "Quality First" is the store motto, and a guarantee of satisfaction goes with every sale. About January 1, 1911, Mr. Foster will add a fully equipped optical department. To this he will give the

THE FLEMING QUARRIES

Credit Valley sandstone has a Dominion-wide reputation and fame, and yet it is not strictly accorate to call it "Valley" sandstone, for it is quarried from the side of a hill overlooking the valley-an elecation from which a glorious view of the surrounding country can be obtained. Credit Valley sandstone has become a popular building material throughout Canada, and its popularity is steadily increasing and the demand for it keeps for ahead of the output. one of the large quarries from which much stone is taken, located a lew miles out of Georgetown, is owned by Mr. J. H. Fleming, of Tostone rock. The sandstone is found

quarries out in such excellent condi-

tion-it being apparently in layers.

trammed by the skilful chisel of man

or put through a saw. A private sid-

ing connects the quarries with the G.

T. Railway, and makes shipment easy, giving these quarries an advant-

age over those not so favorably sit-

uated. Stones of all sizes and shapes

and weights are carved out here and

shipped to the consuming centres.

Toronto is a great purchaser of the

Fleming sandstone, and orders are

now on hand to keep the plant busy

for the next four years, even though

they continue to turn out lifty tons

per day as at present. The beauti

the standard brands.

With a shop that is neat and clean an appearance, and properly kept in all particulars, it is only a matter of course that Mr. W.J. Patterson is enjoying both a good town and country patronage. He has been here only two years, but in that time he has found it necessary to increase his store space by fully a third. When he started he had work for but one horse, now he keeps three busy, and has had a similar increase in his Lane's list of farm and village propemployees. He has added new and up-to-date axtures to his shop, and handles ush, poultry; lard, and butter, in addition to a full line of fresh and cored meats. Mr. Patterson is

MACHINE CO. LTD organized, purchased the building degree of M.B. The next year was they now occupy, and which had stood vacant for a dozen years. The roofs and floors were removed. the best equipment that money could buy 1911, in succession to Dr. A.S. Elwas installed, and the manufacture of knitting machines and winders was begun. The statt was a modest one. There were but three employces, but under the diligent and careful direction of Mr. F. A. Hurley, who is still the managing director, steady and satisfactory progress has been made. Last year there was a 68 per cent, increase in the business done, as compared with the year 1911, and eighteen skilled mechanics are now employed. New and expensive machinery has lately been udded, and not less than \$30,000 has been invested in the mechanical outfit of the factory. Operating power is obtained from the Hydro-Electric service, this having been the first factory in town to use the new power. From the first the Harley-Kay Co. set out to build only first class machines, and to cater to the hest class of the manufacturing trade. That they have succeeded in this aim is Accident, for they now supply muchines to the largest and most disleriminating manufacturers in the
