

THE BARBER PAPER MILLS

THE BARBER COATING MILLS

MR. G. R. COPPING
President Barber Paper Mills.

The Barber Coating and Paper Mills

In April, 1912, the Barber Paper & Coating Mills, Ltd., acquired the interests of Wm. Barber & Bros., and Canada Coating Mills, Ltd., Georgetown, and consolidated them under the one name as above, since which time a great deal of money has been spent in improvements to both plants.

The paper mills situated at some distance from the coating mills, have been thoroughly overhauled, both as regards buildings and machinery and the Soda Pulp plant connected therewith has once again started the manufacture of pulp suitable for high class M.P. books and featherweight

MR. I. H. WELDON,
Vice-Pres. Barber Paper Mills.

paper, for which the mill has already established a reputation. The coating mill is the largest in Canada, being equipped with most modern coating machines together with a glazing machine for the manufacture of glazed box paper, high

Sec.-Treas. Barber Paper Mills.

class coated book, coated blanks, and box board from the product of the paper mill. The following are the officers of the company: G. R. Copping, President; I. H. Weldon, Vice-President; S. F. Duncan, Secretary-Treasurer. Under the present able management the future success of the industry is assured.

WM. GAMBLE Vegetable Gardener

On John St., Georgetown, are located the greenhouses of Mr. William Gamble, vegetable gardener. Mr. Gamble is an old printer, who, tiring of "sticking type," turned his attention to growing things. His trade has been increasing so much that last year he doubled the capacity of his plant. He now has 7,500 feet of glass, and next year expects to build two more greenhouses 300 feet long. Lettuce for winter use is a big item at this season with Mr. Gamble. He also has two houses for the growth of violets. The season for chrysanthemums, about Easter, and the space occupied is then devoted to the growth of early tomatoes. Pot plants and bedding plants form a considerable output. About an acre is devoted to the growth of celery in summer time.

Mr. Gamble has a keen market in Georgetown, Brampton and elsewhere for all he can produce in the way of vegetables—in fact he cannot begin to supply the demand. The outlook for the future is, therefore, for a steady expansion of this business. Mr. Gamble is a Georgetown boy. He worked on the Globe and Mail, at Toronto, as a compositor, as well as in cities across the line, spending fifteen years in the trade. He is now a member of Georgetown Public School Board.

THE PUBLIC SCHOOL

Georgetown has good reason to be proud of its enlarged and improved public school. As will be seen from the picture in this paper the building presents a very attractive appearance. The building of an addition of four class rooms and two teachers' rooms this year has given us a ten-roomed school, with modern equipment. A new heating plant, together with the present excellent sanitary conveniences, puts this school into the first class.

The present principal, Mr. A. G. Green, came to us over a year ago from Peterborough, where he had successfully filled the position of Principal for five years. Previously he had taught for eleven years in fiction.

The present teaching staff comprises six teachers and the principal, Misses Annie Hyslop, Hazel Harrison, Mary Langman, Nellie Roe, Bessie Kay, and Elma Robertson.

The Public School Board is as follows: Kennedy (chairman), J. A. Thompson (Secretary), Neil Hunter, W. Gamble, Chas. Roe, J. Hilt.

L. L. BENNETT, L.D.S.

Dr. Bennett is one of the oldest residents of Georgetown, and has spent all his professional life here. He practiced dentistry before the Ontario Dental College had an existence, but obtained his degree in 1868. The first year an examination was held. His certificate is one of the first seven that were issued in Ontario. As he had been at work as a dentist for four years previous to getting his certificate, he will come to his jubilee in 1911. Dr. Bennett has seen many changes in Georgetown, and in its business and professional men. He is now giving careful attention to the preservation of the teeth of a third generation. Dr. Bennett has had a long connection with the official board of the Methodist Church, and is a member of the High School Board.

J. H. JACKSON Departmental Store

Mr. J. H. Jackson has under his management the most varied stock of merchandise to be found in Georgetown, and it is eminently proper to call his Departmental Store. From a humble starting point, Mr. Jackson has, by foresight and hard work, developed one of the big businesses of the town. The lower part of his establishment comprises a store, with basement, and he has a second floor that covers three and two others, five in all. The situation is in the Barclay Block, opposite the Post Office. He has been in these premises for twenty years, but began business for himself in other quarters in 1881. At that time he handled only boots, stationery and fancy goods. In 1887, house stoves, tin and granite ware, in 1901, staple dry goods and millinery, and so step by step progress was made, until now Mr. Jackson is in the position that he can undertake to outfit a dwelling house in every partic-

RESIDENCE OF MR. L. KENNEDY.

ular, from cellar to attic. He papers the walls, carpets the floors, hangs the draperies and pictures, supplies the furniture, bedding, linen, kitchen utensils, cutlery, and every other need with the exception of the food supply. In addition to the different lines already mentioned, Mr. Jackson has a well-stocked book department, a big stock of toys, sells newspapers, periodicals, etc.

For twenty-nine years, ever since the first telephone line was built through the district, he has been local manager of the Bell Telephone Co. From ten to fifteen persons are employed on the premises.

MAJOR L. GRANT

Mr. Lachlan Grant is a son of "Bonnie Scotland," but left the land of the heather in early childhood, and has spent his life in Canada. He has been associated with the business, social and religious life of Georgetown for nearly fifty years. Up to the year 1888 he was a dry

MAJOR L. GRANT

goods merchant. In 1890 he was appointed Clerk of the Court and held this office for seventeen years. He was a member of the town Council for a number of years, and was elected in 1910. He has always taken a keen interest in educational affairs and has given faithful service as trustee of the High School, and as a member of the High School Board. For forty years he was in the employ of the town, and has given faithful service as trustee of the High School, and as a member of the High School Board. For forty years he was in the employ of the town, and has given faithful service as trustee of the High School, and as a member of the High School Board.

JOHN BALLANTYNE

For over 32 years Mr. Ballantyne has been in business in Georgetown. He deals in coal, wood, granite, house stoves, tin and granite ware, cutlery, and every other need with the exception of the food supply. In addition to the different lines already mentioned, Mr. Ballantyne has a well-stocked book department, a big stock of toys, sells newspapers, periodicals, etc.

Mr. Ballantyne came to Canada from Ireland in 1863. He has been living here for the fifty years since. He belongs to the A.O.U.W., I.O.F., Order. He has prospered here, for he owns a good deal of property in town.

GEORGETOWN PUMP WORKS

H. A. Gartley Prop.

Mr. H. A. Gartley has been connected with this business during the twenty years he has lived in Georgetown. For most of this time he was in partnership with his father, but since 1911 has had the business on his own name. Originally only water pumps were sold, but now the shop is almost entirely for those made of iron. Mr. Gartley not only supplies the pump, but he finds the water for it. In the drilling of artesian wells he is an expert, and his services are in demand for a distance of twenty miles in several directions. The average depth at which flowing springs are found, throughout this district, is about one hundred feet. Mr. Gartley has a wind mill and a portable engine. He winds mills and sets up power purposes in his own factory. In addi-

DR. F. R. WATSON Dentist

Dr. Watson is a native of the town in which he now practices his profession and has lived his life here. In his younger days he was an enthusiastic lacrosse player, and was a member of the team that made Georgetown famous. He was twenty years ago. In 1870 he graduated from the Toronto Dental College, and has since that time been a member of the Ontario Dental Association. He has received a diploma in dentistry from the University of Toronto. He has been a member of the Ontario Dental Association since 1870, and has been a member of the Ontario Dental Association since 1870. He has been a member of the Ontario Dental Association since 1870, and has been a member of the Ontario Dental Association since 1870.

DR. F. R. WATSON

spends his summer vacation near Port Carling, Muskoka, where he owns a pretty cottage.

ARE YOU VERY BUSY?

Every little while you read in the papers that so many persons have died from Consumption. It is all very far-off and matter of fact, and possibly it never arrests your attention. Do you ever realize that each one of those "cases" more than in an official record—is a black tragedy to somebody, that behind each one of them lies long, hopeless days of pain, feverish nights of despair, lifetime plans that must be laid away, grinding poverty, perhaps a wife to fight her own way after months of children's deaths, lifetime plans that must be laid away, grinding poverty, perhaps a wife to fight her own way after months of children's deaths, lifetime plans that must be laid away, grinding poverty, perhaps a wife to fight her own way after months of children's deaths.

DOES IT MATTER?

Does it matter to you that of all the men, women and children who are each year in Canada one in seven is a victim of Consumption? Does it matter that one in every three of those who die in the full glow of life die with plans and hopes and loves that must be given up? Does it matter that a few persons have joined hands and within a few short years have saved thousands of those unhappy ones and can save them all if only there is a little more help and a little more money? Perhaps it doesn't matter. It is all very interesting but it is an immediate concern of yours.

NORVAL FLOUR MILLS

Norval Mills were established in 1888 by the late Robt. Noble, and were conducted by him up to the time of his death, five years ago. Since that time this large business has been successfully operated by his son, Mr. A. L. Noble, in the interests of the estate. A joint stock company is now in course of formation, and after the new year the firm name will be Robert Noble, Limited.

These large mills are situated on the River Credit at Norval, about 2 miles from Georgetown, and the machinery is operated entirely by water power. The mills have a capacity of 230 barrels per day, and run night and day the year round. The following celebrated brands of flour are the product of their mills: "King's Choice," "Norval" and "National," and are known in almost every household from here to the Atlantic Ocean. Besides a large local trade, these mills ship to Toronto, Eganville, townships of Quebec, Quebec City, and St. John's, N.B. They also export flour to Glasgow and Belfast. The custom mill for chopping and grinding feeds for stock has an immense local patronage. In addition to the business conducted at Norval, this firm operates a large elevator at the G.T.R. station at Georgetown, and a grain elevator and flour and feed store at Acton. They buy all kinds of grain, and thus offer a constant market to the producer at the highest market prices.

Resides the large amount of excellent wheat received at the mill door, there is a large amount of hard spring wheat brought from the West and used for blending purposes, thus enabling this firm to compete very

O'NEILL'S CARRIAGE FACTORY

Preparations are now being made for a switch from the Toronto suburban Railway to the mill. The reputation of this firm for square, honest dealing, and the high quality of their output has won for them a very large and growing patronage.

The Robert Noble estate has also been largely interested in farming, their lands being beautifully situated along the banks of the River Credit, and they have recently sold a large block of land for a site for the new Upper Canada College, which will move from Toronto to Norval.

J. N. O'NEILL'S CARRIAGE WORKS

The carriage works and show rooms, owned and managed by Mr. J. N. O'Neill, occupy a big section on the west side of Main Street. This is one of the town's substantial industries, and the enterprise and energy shown in its management are of the kind that always bring success. The present proprietor succeeded Messrs. Culp & McKenzie in 1908. He enlarged the building and put in a complete outfit of wood-working machinery necessary for carriage making, and also added to the equipment of the blacksmith shop. He keeps ten

HOTEL MCGIBBON

This fine three-story brick building occupies one of the best business corners in town, with a frontage of 50 feet on Main Street, and extending back on Mill Street for 90 feet. Mr. S. H. McGibbon, whose general face is pictured on this page, has owned and managed this hotel which bears his name for nineteen years, and has become well and favorably known to the travelling public, and the patronage extended to him and his family. There are 33 well-furnished bedrooms, and two large and well-lighted sample rooms, and it is not an uncommon experience to have all these rooms engaged. That Mr. McGibbon desires to make his guests as comfortable as possible is shown in many different ways. A steam heating plant has just been installed and every room in the house is now individually warmed. Electric lights are in use all through the house, and gas is used for cooking. There is a complete outfit of wood-working machinery necessary for carriage making, and also added to the equipment of the blacksmith shop. He keeps ten
