A LITTLE LOVE

By Florence E. Buck A little love enatched from the mesh That go to make life full of murmurings. Viewed in the life of retrospect—one day Will prove a jewel that shines bright for

A little sympathetic clasp of hand is language all the world can understand;

A recollection that in after years. Oan fix the balance—weigh the smiles In just proportion-free the soul from This is the best analysis of life.

Yet better still, a spirit dauntiess, brave, To drain the cup, the portion that He To love to work to miller then to die Triumphant, with the cross uplifted high!

SAME THING HERE

A correspondent in one of our exchange es, makes the following very truthful re-

the views of those people who imagine that if one does not agree with them on any of the questions of the day, they might as well pass in their checks for all the good they are or will be in the future. Every once in a while we read of a 'life long reader of your paper,' that he is surprised at your turn over to the enemy; or your attitude on a certain question or your attitude on a certain question, and so on, and so on; and from this day henceforth, will not allow the paper to enter his house to the end of his pipe dream. Well, when we read of a few of these spasms we just look for the announcement of the suspension of the announcement of the suspension of the whole business on account of this man stopping his paper. Bay, we would hate to know as little as those people who are so wrapped up in themselves that if one does not agree with them and their little one horse views—lofty ideals they think they are—one might as well take to the tail timber at once. Just the same, it is tall timber at once. Just the same, it is laughable to read those funnigrams and the littleness of the writers in question." To get down to realities of human nature and the peculiar make-up and varieties of peoples living in this world today, the man who runs a country newspaper is the one who can tell you all a-

Story of a Scots Beadle.

Scotch stories. He tells one concerning have been known to drop bombs on ena certain beadle whose duty it was to emy trains and transports from fairly show some visitors over the ruin of an good heights and also on the vital old abbey "somewhere beyond the parts of bridges and on depots and Tweed." On one occasion a lady, at the close of the inspection, merely thanked the beadle, as she went out of the gate, and he ren arked: "Weel, my leddy, when ye garg hame, if ye fin' oot that ye have lost your purse ye mann recollect that ye hav'na had it oot here."

Positive—Convincing Proof It is all very well to make claims, but can they be proven? We publish the formula of Vinol to prove the statements we make about it P. Cod Liver and Beef Poptense, Iron and Mangasees Poptenates, Iron and Am-menium Citrate, Lime and Soda Glynero-pheephates, Concaria.

Any doctor will tell you that the ingredients of Vinol as published above, combine the very elements heeded to make strength. All weak, run-down, overworked nervous men and women may prove

There is nothing like Vinoi to restore strength and vitality to feeble old people, delicate children and all persons who need more strength.

Try it. If you are not entirely satisfied, we will return your money without question; that proves one without question; that proves our The human hand today is perhaps the fairness and your protection. The human hand today is perhaps the most versatile thing in the world. Your

Top Buggy new.

In case of stormy weather there will be good accommodation for horses, and sale will be held under cover.

TERMS—\$10 and under, cash; over that amount a months' predip on approved joint notes. Cash per cent per annum

THE THRONE IN THE HOME

Where Two Should Rule as One to Im-

sure Real Happiness. "A man may build a throne for the woman he loves," says the Mother's Magazine, "but he will find that to make her a queen he must mount it beside her, for only where two rule as one can either hold true sway. Whether married or single, we do not live unto ourselves alone. All the world somehow is affected by what we are, and in the married state we have a greater obligation than merely to keep the peace or to observe the conventions or Words are but wasted, where the human to demonstrate how we can improve upon God's law of life and love.

Can thus interpret life—it is an art.

The is well that we should use every

God given power of mind and spicit every quality and grace and virtue at our command, before and after, in order to live up to the privileges and responsibilities of marriage. But marriage fortunately is a thing of the heart father than of the intellect, and

ward matrimony that would drag it down to our own level and that of comprehension and make it a merely human mistake instead of a divine site.

"If we would make it a blessing instead of a curse, if we would have it encompass all of our needs in joy and sorrow, it we would have it endure with us through life and eternity am the sublime fact of our existence, we must live up to it hour by hour in a spirit of faith and hope and charity."

### BOMBS FROM AIRPLANES.

Simple Device That Aids in Dropping the Missiles Accurately. At the numerous aerial bombing schools pilots and observers are taught how to drop bombs accurately on stationary and moving objects on the and on captive balloons. Bombs of all classes are used, from the eight pound high explosive bomb to the 200 pound bomb as well as the phosphorus and rochambite bombs.

The instrument that is used in directing the placing of a bomb on the object aimed at is a simple device and is pro vided with several adjustments that can be made almost instantly. One of these gives the speed at which the xnachine is traveling, another is an ordinary water level, and both in conjumetion with two mirrors which show the pilot the ground below serve to min the bomb. The wind has to be serious. ly considered when dropping bombs, and most bombs are dropped up wind. Bomb dropping is a most important

Sir Henry Oliver has a fund of good branch of the air service, and pilots railway junctions, munition plants, ser. odromes and submarine bases.

> The Track of the Earth If the sun and earth and the earth's orbit could be seen, then the track of the earth would be a spiral around that of the sun. Go take a broomstick, wind wire around it like thread on a spool, take out the stick and stretch the coll until the space between each turn is, say, one-third of an inch and make a hundred turns of the wire. Then this spiral or coil would represent the track of the earth through space during ! hundred years. The sun moves toward the star Vega at a speed of twelve miles per second and carries the earth,

SHAPE OF THE HAND.

all the planets and their moons slong.

But they all move around the sun at

the same time and therefore traverse

spirals, represented fairly by extended

The Reason Our Fingers Are Not Aff of the Same Longth.

There is no known reason why our fingers should be of different lengths today. In fact it is thought by some people that the hand would be stronger if the fingers were all of the same length, says the Book of Wonders. Certainly, however, the mends would not then be so beautiful and might nos be so useful.

can do more things with the hand than with any other thing in the world. The probability is that the shape of the hand today and the length of the fingers are the result of the different things the human being has called upon the hand to do during man's development up to the present time.

We must go back to the time, howthat is probably the real explanation. Originally man's lingers were of different lengths because all four footed animals had the same peculiarities. The shape and length of the toes and their arrangement were the ideal arrange-

the clouds the sun is shining." "Yee, and somewhere below the sea there's a solid bottom. But that doesn't help a man when he falls overboard."

—Battimore American.

### A FAITHFUL HORSE

Paul Revere's Sturdy Steed Fairly Entitled to Fame.

Paul Revere's name was made immortal when he rede from Boston to Lexington and Concord warning the patriots along the way of the British approach, and his fame has been securely enshrined in the hearts of all Americans.

Historians have honored themselves in honoring him. Poets have found inspiration in praising bim. He is an idol of childhood, an example in the prime of manhood and a solecting mem-

preat peaks above the mountain ranges summer fuel. And Paul Bevere was one of these He was one of the precious few great enough to grasp an opportunity to do . Paul Reverd let un ap longer fotget that there was snutber bero in that There was the home.

Any other borse might have done as well, you think a Well, so might any other man have done as well perhaps. So might we dippontly disparage and

But, the fact semains that it was Paul Revere and Paul Revere's horse that did it. And the harder work fell on the horse. But for the true horse's fakhfulness Pau: Revere would have

Learn History by Novels. In the Woman's Home Companion "One of the pleasantest ways I know of making varied travels into history is by reading historical novels. I remember that when I was twelve years old I read Harrison Ainsworth's 'Windsor Castle,' and when I was fifteen I read Scott's 'Kenliworth.' When I was sixteen I read Hawthorne's 'Scarlet Letter.' I was not thinking of history at all when I read them. I read them solely for the story. Yet from those three books I learned more of the times of Henry VIII, and Queen Elizabeth and of early American days. I do believe, than in the many historical chapters covering those times that I have read since. Those books made these times live for me, and it was as though I myself were living in them."

Van and Semiramis. Van is a city of immemorial antiquity, which gave the name to the "Vannic empire" of Assyria, and was supposed to have been founded by the semi-mythical Queen Semiramis. Unless cruelly libeled by the legend she was no better than she ought to have been, which is not surprising if she really was a daughter of the mermaid who ruled the neighboring lake. Van is today famous for the cunelform inscriptions, indelibly printed on rocks, by which forgotten Van dwellers at once preserved their historical records and provided against future "paper fam-

The Wetting of England. If the king of England were to renounce the throne and resolve to beome an ordinary citizen be would be called George Wettin. How does the name Wettin come to be the king's surname? This is the answer: Queen Victoria married Albert, duke of Saxe-Coburg-Gotlin, of the sentor branch of the house of Saxony. The

family name by which this house, dating from the middle of the tenth century, came to be known afterward was Wettin, and this was and is the surname of both branches—the Ernestine and Albertine-of the house of Saxony. The name comes from the castle of Wettin, near Magdeburg, which claimed Wittekind as the founder of the

The Apache of the High Seas. The submarine is the veto power of sea. It is purely obstructive and destructive. It contributes nothing to realth or civilization. It is in a class apart from other craft. The other forms of water craft can be used and place to live in. They convey merchandise and passengers. They serve as a means of communication between nations and peoples. The submarine is a mere killer. It cannot even fight. It must kill furtively and secretly, like an assassin .- Edward G. Lowry in World's

Not an American Proverb. Homer sometimes muds, even nowadays. The Saturday Forlew is responsible for the statement that the provorb "Honesty is the best policy" was improved in the United States into "Make money-bonestly if you can, but make it." Quintus Horatius Flaccus was not an American citizen and the great American republic was not thought of for a good many centuries after he penned his famous injunction, "Rem facere, recte al posses" (Do a thing, but do it right if possible).-London Globe. --

Extinguishing Burning Liquids. Many people have often wondered why it is permissible to use water for extinguishing some burning liquids and not for others. For instance, water is effective for extinguishing burning alcohol or acctone, but quite the reverse in the case of gasotine or oil. The difference lies in the fact that water mixes rendily with the first two liquids, while gasoline and oil do not mix with water, but float upon its surface and are thus scattered over a large area.
