KEEP THE HOME FARMS WORKING

They have called them from the High School.
They have called them from the club.
And the country found them ready.
At the nation's call for good,
And proudly now they leave us.
These hardy sons of toil,
So give three cheers for the volunteers.

The soldiers of the soil.
Chorus—
Keep the home farms working,
There's no time for shirking,
While our lads are far away,
They must have food,
So we'll put a harvest maker
On each waiting acre,
Until we know the German foe
Is licked for good.

They have left the home and office,
And they'll work with might and main,
That our men may lick the Kaiser,
And come back in peace again.
We will load our ships with produce
And the U-boats we will foil,
So don't forget the farmerette,
And the soldier of the soil.

—Wilfred Reeves.

Important Points in Hatching Chickens

During the hatching season the poultry house and particularly the nest should be kept clean. Clean water and a supply of whole grain should be accessible to the sitters and a dust bath should be provided also. If more than one hatch is being taken off, clean out and disinfect the nest after each hatch and put in new sod and fresh litter. Dust the hen with insect powder before putting her in the nest and again a day or two before leaving the nests with the chickens. It is a good plan to put into the dust bath a little dry sulphur or ground tobacco.

Be sure also that the house is free from mites. These little pests get into the cracks and corners of the building and at night, as the hens are resting, they come out of their hiding place, get on the hen's body and it does not take very many of them to make a hen so uneasy that she cannot sit. In some cases the mites become so troublesome that they actually worry the hens to death.

HOW TO GET RID OF MITES

Clean out the house and thoroughly sweep, not forgetting the windows, walls and ceiling. When this is all swept out clean, use a garden hose or a stiff brush and hot water. See that everything in the cracks and crevices is washed out. After this is done allow the house to dry for a while and if everything then appears to be clean, use a good disinfectant and be sure that the solution is forced by the spray or brush right into the cracks and crevices. If the mites are bad, use boiling hot water followed by coal oil and liquid lice killer or lice paint. Be sure that this goes into the cracks and crevices and when you have gone over your house thoroughly according to the above treatment in all probability the mites will be exterminated, but it is advisable in the course of three- or four days again to inspect for mites and perhaps to repeat the dose once more.

Georgetown, May 7th, 1918.

Mr. J. M. Moore:—
As an item of possible interest to yourself and other readers of your paper, I desire to state that since the fire at the woolen mills, Mr. Henry Corke has paid into my hands the sum of \$4,000.00, the amount of loan given him, and I now hold the same in trust for him.
Yours respectfully,
J. W. KENNEDY,
Corporation Treasurer.

—\$100 reward given to any person or persons who will supply information which will lead to the conviction of the party or parties who are responsible for knocking the top stones off the stone fence at the end of Main Street.—J. A. Willoughby.

—An entertainment will be given in the Town Hall, Glenwilliams, Friday, May 17th, under the auspices of St. Alban's Church, consisting of songs, recitations, etc., and a two act play will be given by The Girls' Guild of St. George's Church, Georgetown, entitled, "The Parish Fair."
