Need Not Demand Cards
 There is some controversy as to whether merchants should demand cards of their customers. The Canada Registration Board has cleared up the point with the following statement:—It is not necessary, according to law, that any hotel proprietor, railway company or merchant, or anyone doing business should demand the registration card of those they are doing business with. In a prosecution it would be necessary for the crown attorney to prove that the hotelman or the railway man or the merchant, or anyone doing business that the person he was dealing with had not a registration card.
Hot Weather Tips
 Dr. Hastings, M.O.H., of Toronto, advises citizens to drink plenty of cold water direct from the taps, noticed water, during the hot spell. Frequent baths in tepid or cold water will be most refreshing. Alcoholic beverages should be avoided, also all forms of animal food. Fruit, vegetables and cereals will be found far more beneficial and less food than usual should be eaten. The doctor said everyone should keep in the shade as much as possible and avoid exertion. If this advice is carefully followed there will be few cases of heat-stroke or collapses. Babies should be allowed as much freedom as possible and be clothed with the lightest of garments, and no more than absolutely necessary.

Putting War Cripple Back on the Payroll
 Fifty Maimed Soldiers Will Demonstrate Vocational Training at the Canadian National.

Much has been heard regarding the plans of the Dominion Government to help war cripples to secure remunerative employment in spite of even most serious wounds of injuries. But, though Canada is conceded to be in advance of all other Allied countries in the work of retraining her maimed heroes, comparatively few people have seen actual maimed being wrought for the men by specialized vocational training and physical reconstruction work. This will be remedied at the Canadian National Exhibition where at least fifty maimed men have been selected to fill the ranks of the "Governmental Rehabilitation" program. These men have been carefully selected and will be trained in various lines of work. They will be taken to the exhibition and will be back on the pay-roll of the Government. Some of the maimed men will be taken to the exhibition and will be back on the pay-roll of the Government. Some of the maimed men will be taken to the exhibition and will be back on the pay-roll of the Government.

The Less Waste The Better The Service
 "SLOW" telephone accounts -- the accounts on which repeated efforts to collect must be made -- result in waste of time and labor.
 Most telephone users pay their bills promptly and the labor and time of collecting them are reasonable.
 But some subscribers overlook their bills or neglect to pay them promptly, and the work of collecting such accounts is laborious and time-wasting.
 The elimination of waste in the telephone business means better telephone service. When we can do away with any waste time or labor that may be involved in furnishing service, we can put an equal amount of time and labor into the service itself to the benefit of all telephone users.
 Help us, by the prompt payment of accounts, to avoid waste time and labor and to concentrate on the enormous amount of necessary work that war-time conditions demand.

BANK OF HAMILTON
 ESTABLISHED 1827
 THE greater the creation of wealth, the heavier is the burden of necessary taxation on the individual. Private interest as well as patriotic duty impels both farmers and manufacturers to augment production. In the development of the industrial and agricultural wealth of Canada, the Bank of Hamilton means to be an important factor.
