FORGET IT

Has a friend or a neighbor been strangely unkind, And you're aching to make him regret it? Don't give him in anger a "piece of your mind"— Just hold your tongue and "forget it." Are your motives impugned when you stand for the right? It will anger you sore if you let it. Don't roar like a lion that's spoiling to fight— Consider the source and "forget it." Is work never done? The way to break with toil? Does discouragement seem to beset it? They ne'er can overcome who from labor recoil, Keep your eye on the goal and "forget it." Has luck been against you in ventures you've made? Has fortune frowned grim when you've met it? Don't give way to senseless, unseemly tirade— Keep begging away and "forget it." Does the honor you sought your rival adore? Just wind up your hope and reset it. There are honors untaken and glories unborn— So turn loose your grudge and "forget it." —By John L. Maynard.

Brunswick PHONOGRAPHS!

Now that Canadians are looking for goods made in their own country, it is well to make sure that articles described as "Made-in-Canada" are really what they claim to be. There is apt to be a certain amount of, well, misunderstanding on this subject.

For example all, or practically all, of the parts of a Phonograph or other articles might be brought in from a foreign country and merely "assembled" or put together here.

The real manufacturing, in such a case, would be done in a foreign country, and the wages would go to foreign workmen and be spent in their own country and not ours. Yet that article may be represented as "Made-in-Canada," and purchased by loyal Canadians on that understanding.

So we want to make it perfectly clear that Brunswick "Made-in-Canada" Phonographs are just what we say they are.

The only part of a Brunswick Phonograph not made exactly right here in Canada is a small part on the reproducer, which costs about ten cents.

It is a fact not generally known, but nevertheless true, that the Brunswick factory makes a larger percentage of its own parts than any other Phonograph factory on the continent.

If every manufactured article used in Canada was brought in from a foreign country **Where Would Your Job Be?**
