Bad Money

Bad money is being circulated in Western Ontario, and it is only by giving the coins the closest scrutiny that the counterfeiters can be detected. Cigar stores, hotels, candy shops, and many others are being victimized. In one London store three half-dollar pieces were passed in less than an hour, and many other merchants have reported receiving similar bad change. The work on half-dollar pieces is almost perfect. The only defect that can be discovered in the milling around the edge of the coin. It is not as perfect as it is on the Government's money. The die work on the head and wreath of napples is considered an absolute replica of the good money. Where the bad money originated is a mystery.
