

Glenwilliams

The following letter has been received from Mrs. S. Wheeler, whose son, Hudson was killed in the Great War.

Mrs. Wheeler considers herself greatly favored, by the kind attention and generous gift of the citizens of Glenwilliams, and returns her sincere thanks for the handsome gift, which they so kindly presented to her in loving memory of her son, Hudson.

(signed,) Mrs. L. Wheeler. The local Orange Lodge has become an active and progressive organization. It has been organized and a number of new members taken in. They intend holding a grand assembly and ball on Halloween night, October 31, particulars of which will appear later. If the members will kindly forward a name and keep this date open.

This district should resume the old motto of an early date. Nothing is gained by continuing on the present time, and if Georgetown would set the example we would fall in line. Congratulations to Georgetown on being a real town.

The Signing of Peace

Has resulted in an immediate return of building activities and consequently is making a large demand for all lines of Hardware, Building Supplies and Tools.

Manufacturers have already reduced their prices, wherever the cost of labor and material would permit, so that the present prices may be expected to stand firm in most of these lines for some time.

The Range of Locks, Knobs, Door Sets, Etc., Carried in Stock by us, consists of the most staple patterns of the leading manufacturers.

We also have an attractive assortment of miscellaneous hardware such as Hat and Coat Hooks, Sash Lifts, Push Plates, Door Bells, Butts and Hinges and Sliding Door Hangers. Garage Sets. Paroid Ready Roofing is in a class by itself.

DELCO-LIGHT Pays for Itself

ANY one of over 75,000 users will tell you that Delco-Light pays for itself. In money. They will tell you that the pleasure and comfort of Delco-Light cost you nothing.

Delco-Light does work on the farm. Saves time for more productive things. Its electric power will, in most cases, save enough time to pay for the complete Delco-Light plant in three years. The electric light you get free.

CHORES are non-productive work. Cut down chore time and you can do things worth money to you. Wm. Schneekloth says the electric power from his Delco-Light plant saves him 8 1/2 hours a week on the churn, separator and washing machine alone—over 40 working days in a year. Think of the money he can make in those forty days.

On the Helms farm at Belleville they use Delco-Light power for the chores—in milking and feeding stock, in pumping water, in ironing and washing—and save 10 hours a week, or about three months of one man's work in the year. Here's a hired man's work for three months which Delco-Light does. The cost of operating Delco-Light is less than the cost of oil for oil lamps.

By operating the small machinery around the farm is only a part of the work which Delco-Light does for you. Take the question of pumping water; with Delco-Light you can have water under pressure at taps anywhere on the farm. You can water stock easily and quickly. You can have hot and cold water in the house. S. W. Cooke & Son, of Maysville, have a big herd of Holsteins. Delco-Light has pumped the water and done the milking for three years. They figure that their saving is not less than \$1,800. As Mr. Cooke says, they could pretty nearly afford a new Delco-Light plant every year. And remember this saving does not include the convenience and comfort and saving of electric lights.

J. H. Lackey raises Polled Jerseys and Folland China Hogs. He, also, needs a lot of water. His Delco-Light outfit enables him to get along without two men he formerly hired.

ROUND the house there is a great big saving of time and work for your wife—time she can very well use for her chickens or her garden or her dressmaking. A. F. Himmenkamp tells us that Delco-Light saves his wife 416 hours of housework a year by operating an electric iron, a vacuum sweeper and a washing machine. Besides—no lamps to clean, no matches to use, no danger of fire, lots of light.

C. F. Tressin adds in the time saved from clearing lamps and makes a total of 547 hours a year. Think of all the things your wife could do with that extra seven weeks. And then you have electric light. You can't know the joy and comfort of electric light till you have experienced it. Just press a button and release a flood of bright, clean, safe light. No matches. No lamps. No danger. Delco-Light gives four times as much light from a gallon of coal oil as a lamp gives.

DELCO-LIGHT is a complete electric light and power plant, easy to install and easy to care for. It will give twenty-four-hour-a-day electric light and power service. Delco-Light is direct connected. There are no belts to slip, break or be replaced. It is self-cranking. Pressing down a lever starts the engine. It is air-cooled. There is no water to carry, to freeze, or to boil away. There is only one place to put oil. A simple mixing valve regulates the fuel supply. There is no complicated carburetor. Ball and roller bearings cut down friction to a minimum. Long-life batteries mean economy. You need to know more about Delco-Light. We have fully illustrated literature showing Delco-Light in operation. Write your nearest distributor for it.

Throughout this advertisement we have quoted from letters received from Delco-Light users. Each of these letters is accompanied by an affidavit. We have prepared a folder reproducing some of these letters, and with photographs of some farms where Delco-Light is used. Your nearest distributor will be glad to send this book to you.
