What Shape IS a Horn?

Did you ever hear of a horn or a magaphone that was square? . Do you know why they never send water through a square pipe? Every phonograph or talking machine has a "horn," but they call them "amplifiers." They are really the megaphones of the machine.

Now what shape do you think this "horn" should be to give the best "tone" and wint do you think it should be made of resonant, vibrat-Alberta, and will remain on the lege; Mr. Eustace Ross, Toronto ing metal or wood-built on the violin principle?

Before you buy a phonograph, find out the skape of the horn and One of the secrets of the Brunswick's wonderful tone on ALL rec-

onto University were home for the ords is the exclusive patented OVAL tone chamber and throat-built entirely of wood, like a fine violin. . It actually DOES eliminate all harshness, all the stridency, and that "tinny" timber that we have always thought a necessary evil of the

All we ask is that you use your own cars-your own judgment-see this wonderful improvement with your own eyes-compare it with anyarrangements have been complet ing in connection with the for- thing you like - at any price. You cannot afford to make a mistake, and it costs you nothing to

> We invite you to come in and hear the New Edison Diamond Discrecor is played on the Brunswick.

Columbia Grafonola

TONE is a test for the ear, not for the eye. The glorious voice of the Grafonola can sing its own praises far better than any words we can put in type.

Before you decide upon a phonograph you should certainly hear the Grafonola. Test its tone by ear. Play any record on any Grafonolawhenever-you wish and as often as you like.

Our door opens with a welcome.
