Two-Party Line Telephone Service

TECESSARY curtailment of new construction during the war, followed by the unprecedented development since the armistice, have resulted in a universal shortage of telephone material

In order to utilize our supply of equipment to the best advantage, to reduce delay in installations to a minimum, and to avoid refusing service to anyone, we ask those intending to order telephones to consider the advantages of two-party line service.

The cost to the user is substantially lower than for individual line; and the service of a high standard.

The rate for two-party line is, for Business telephones \$19.80 and for Residence \$19.80 per annum.

We will be glad to furnish full information to anyone interested.

"Every Bell Telephone is a Long Distance Station."
