HON. W. E. RANBY, Attorney-General, has stated that the Dominion of Canada, must bear the expense of the Ontario referendum on the liquor importation question. He said the vote would be taken the Federal authorities received the request from the Province.

THE IMPORTATION of alfalfa (lucerne) hay, whether for feeding, packing or other purposes, originating in the States of Idaho, Utah, and also in certain counties of Wyoming and Colorado, is prohibited. This step has been taken to prevent the introduction into Canada of the alfalfa weevil. The probibition does not extend to shipments of this hay transported through the districts mentioned on a through bill of lading.

OHF IT IS TRUE that history reshall have hard times again. A period of unrest and fluctuating prices has followed every war in history. This so called prosperity which has followed the war world: is built on a mighty vacuum and will topple sooner or later. We may escape it. Read a little history and see if this is not true. You will find that high cost of living and extravagance have followed every war; that this period through which we are passing is not worse than many that have preceded.

THERE ARE A NUMBER of people street or lane in this world who are content to git around waiting for what is 80- 4-21-31 ing to happen. Their lives generally denote that very little comes to the one who doesn't get up and bustle. In this and other respects the world is a hard task master, but it is also a just one. The same principal applies to a municipality. If we were content to sit around and wait we are going to make very little progress during the year 1920, and as there is such a great deal to do, more especially along the lines of civic progress, and securing additional house accomodations, it is high time we got busy and got down to working earnestly.

WITHIN THE NEXT few months, newspapers in Canada will have to choose between advancing their prices, for both subscriptions and advertising, or going out of business. Before the war newsprint sold at \$40.00 a ton. A few weeks reached \$98.00 in the open markets. According to information received at this office last week the price now varies from \$120.00 to\$ 150.00 a ton and the opinion was offered that the price would soon exceed \$200.00 s ton. It doesn't require any gift of prophecy or any degree of intelligence to see that newspapers will have to adopt a higher scale of prices if they are to live.
