

Milton

W. H. Morden, warden of Milton, went to Toronto last Friday to confer with the warden of Peel and Dufferin about the proposed union jail for the three counties. As expected, he opposed the scheme as far as Milton was concerned, leaving Peel and Dufferin to decide whether they would unite on a two-county jail. Milton also factory responded that week after its employees had a two-week vacation. There was a reception for Hon. W. L. Mackenzie King at the residence of Dr. and Mrs. H. A. McCall after last Friday evening's meeting. Fancy prices are quoted for coal now \$14.00 per ton, the latest. W. N. Scott has sold two cottages of all-time off fifteen acres for \$2400 and has sold a third cottage. Secretary A. I. McCall of the Farmers' Co-operative Co., Ltd., says the sugar delivered some time ago to the members as 17¢ lb. was ordered last November, before the latest increase in price. There was some difficulty in getting the vendors to carry out their contracts, but they had to do it. The company supplies sugar now at 20¢ the gross price. "This Cox of Kingston is in town Thursday," he had one of his "crutches" about his neck and is on crutches - Champion.

**We heard a man say:**  
"Let the Telephone Company use the profits they made in prosperous years, if they need money to build more plant."  
That's exactly what we have done!  
Shareholders of the Bell Telephone Company of Canada have been paid only a moderate return on the par value of their stock—no more!  
We have made no distributions of bonus stock, no 'melons' have ever been cut; no distribution ever been made of surplus earnings. Every share of stock has brought us its par value, or better.  
For forty years we have consistently used all surplus earnings, all idle reserves to buy more telephone plant. Every dollar has gone back into the business to extend it and serve new subscribers.  
What has this policy meant to the public?  
The Board of Railway Commissioners at our last rate investigation found that if we had not pursued this honorable course of turning all surplus earnings back into the business we would have had to provide in the year 1918, alone an additional \$908,000 out of revenue to pay interest on the plant so secured. This, of course, would have meant higher rates to subscribers.  
The fact is, we need millions of new money just because our funds have always been at work, keeping down our bond and stock issues, and ensuring low rates to our subscribers!
