What is the Ultona?

The Ultona is not a phonograph, but it is a very important PART of a very good phonograph. If you look closely at the Brunswick phonograph you will see a reproducer of an entirely different type than you have seen before, in fact a double reproducer. It is balanced accurately. And it has places for three types of reproducing points. That is the Ultona. The object is this: to enable you to play the various kinds of records in the proper way—and to get the most musical value out of them. This gives you an opportunity to enlarge your musical library—to extend it in any direction you may desire without added cost or attachments of any kind. The Brunswick is one of the standard instruments of the present day, beautiful in its cabinet work and admirable in every detail of equipment. You will enjoy hearing it. Call in and hear the Edison diamond disc records played on the Brunswick. Let your ears be the judge.
