The undersigned has been instruct

to sell by Public Auction at lot 31, Con. 2, Esquesing, adjoining Acton, on MONDAY, JANUARY—9, 1922.

at one o'clock sharp, the following:
HORSES—1 heavy mare, 7 years, 1,500 fbs., Baron Gartley; 1 heavy mare, 7 years, 1,500 fbs. This is an indeed form team. 1 brown mare, 1,375 ideal farm team. I brown mare, 1,875 Meal farm team. I brown mare, 1,375
he, 7 years, good in all harness; 1
hey golding, rising 4 years; 1 brown
driving horse, 3 years; 1 delivery horse,
Kentucky Boy, 8 good driver, with
lots of speed, and any lady can drive
him; 1 yearling Percheron colt.

CATTLE—1 registered Holstein
(Roms Veeman) No. 24821, fresh, with
heifer calf at foot; 1 Durham cow,
fresh calf at foot; 1 Holstein cow,
fresh 6 weeks, calf at foot; 1 Jersey
cow, fresh 1 month, calf at foot;
1 Ayrahlre cow, 2 months, calf at foot;
1 Holstein cow, milking 4 months and
bred again; 1 Holstein cow, milking
34 months and bred again, with calf at

bred again; I Holstein cow, miking 114 months and bred again, with calf at foot; I Holstein heifer, milking well, due in June, this heifer gave 38 lbs. of milk a day; I Holstein heifer, milking yet, due February 28, this heifer gave 37 lbs. of milk; I fawn cow, milking the line in April: I hear cow, milking the line in April: I hear cow, milking well, due in April; 1 black cow, milk-ing well, due April 18; 1 Jersey cow, milking, due March 3; 1 Holstein cow, due time of kale; 1 white and fawn beifer, due time of sale; 1 Hoistein cow, due Jan. 16; 1 Hoistein cow, due Jan. 17; 1 white cow, due February 16; Durham cow, due in April; 1 spotter Durham cow, due in April; I spotted cow, supposed to be in calf; I blue cow, supposed to be in calf; I Jersey belfer, due time of sale; I Holstein heifer, due time of sale; I Durham heifer, due January 19; I Durham heifer, due January 20; I Durham heifer, due January 22; I Durham heifer, due January 22; I Durham heifer, due January 22; I Durham

heifer, due January 23; I Durham beifer, supposed to be in calf; I black heifer, supposed to be in calf; S yearling heifers. This is a fine herd of selected cown, a number of which have given sixty pounds of milk a day. They are in the pink of condition and are bred to the noted Shorthorn, "Golden Fame," No. 136415. Gold-horn, "Golden Fame," No. 136415. Gold-horn, "Golden Fame," No. 136415. Gold-horn Balls, imported, (No. 25803), he sire Sultan Champion (No. 101553), he sire Sultan C Having disposed of the Cloverdaie Dairy I am therefore clearing out this

fine berd.

PIGS—1 sow carrying second litter,
bred October 11; 1- young York sow,
tred September 22; 1 young York sow,
bred October 21; 1 young York sow,
bred October 21; 1 young York sow,
bred October 22; 1 young York sow,
bred November 2; 1 registered York

Farmers Friend bred November 21; I registered York sow, Hillcrest Lass No. 16-75325; 1 registered York sow, Hillcrest Lass No. 15-75224. Their sire was Ottawa Augustus No. 145-72067, their dam was Ottawa Lass No. 241-63272. These sows are all bred to a registered York hog, Sandy Sunbeam. 14 shoats about 160 lbs.; 2 good breeding swes.

IMPLEMENTS—1 Hinman Canadian Startford milker, with two units.

R. J. KERR, Austicheer, Phone 24, Acton.

The Montana grasshopper is alstrong of wing and gifted with a surprising appellte.

hoppers there, and the growing crops style? The utmost care should suffered much damage last summer | be exercised in the selection of an from the depredations of the insects. Instructor. One of the methods adopted in fighting them has been to distribute in the fields a poisoned bran mash, reudered attractive by mixing it. with chepped or ground oranges and

Ent mological experts, appealed to for help, have been making a study of different kinds of grasshopper hait, with a view to finding out just what was most appotizing. The me, hod adopted was to out in a wide circle in an infeated deld a dozen or more pans, each contairfing a delicacy that might be

tempting. In one pan was banana pulp, in a second apple pulp, in, third watermelon pulp, land fourt cauteloupe pulp, in a fifth orange pulp, in a sixtli lemon pulp, in i seventh lemen extrac, and in an eight Vanilla watract. The table being thus set, so to speak, an observer with a field ginss watched the pans (which were numbered), and counted every hophe:

that hopped into one or another of iren. An assistant stood at his side and kept the record. In one such test there were 2.07 hoppers that dined on the luxurles offered. Of these 242 chose vanilla atrict, 174 preferred watermelon. 152 elected for orange, 142 decided in favor of cantaloupe, 135 picked banana and Ill selected lemon

But one of the pans, contained sequent trials proved that the insects found amyl aceta.e much more appetizing than anything else. It was a useful discovery. enceforward the Montana farmers will go in for amyl acetate on a larger scale for grasshopper bait. It is far cheaper than oranges and lemons and more easily used. Vanilla extract seems to be excellen, for the purpose, but it is too expensive.

red cow 5 yrs. supposed due Apr. 24, red cow 5 yrs. supposed due Apr. 24, red cow 5 yrs. fresh, 6 grey steers 1 yr., 3 red ish Aquarium Society's Exhibition in London will have an opportunity of inspection many curious variaties. Fighting Fish. of British and foreign fresh-water fish and water plants. Among the racities from the tropics may be mentioned the angel fish from the Amazon - a small fellow, in shape very like a half-moon and of beautiful color - and the paradise fish from China, another charming varlety that builds a bubble nest. The male first elects a series of bubbles from his mouth, then swallows the BEST SCRANTON COAL

eggs, af erwarde (discharging them under the shelter of the bubbles. Betta pugnix, the Slamete fighting fish, will also be seen. This fish, when faced with its antagonist, in its excitement assumes the most dassling colors and at once darts to the attack. These fish fights have a great fascination for the Slamese. Betta pugnax is about the size of a minnow, and all these tropical fish are on the small side. Sword-tails from Mexico, fish that keep their eggs in their mouth, and others that produce their young alive are also on view.

We Don't Believe It! A man with a keen sense of the humor of American hustle is responsible for the following: "The best time achieved for assembling a car complete is forty seconds. The latest development oftime-saving methods at one factory is for a customer to pass his cheque into a slot machine in the counting-

house and press a button, whereupon he is whisked along on a traveling pathway at thirty miles an hour to the delivery end of the factory, three-quarters of a mile away. "There he finds his car ready, with the engine running, all built during the short interval occupied in getting to the exist. As he passes through the gates a mechanical hand shoots out and hands him a cigat. whilst a concealed gramophone wishes him 'good day and good

Officin of Goltres. An interesting note presented to the Academy of Sciences in Paris may explain the frequent presence of golires in certain regions, and defultely ascertain their origin. MM. Chatton and Terrier have discovered that in Lower Alsuce bats are affected with tumors under their skin caused by a microscopic parasite called atrypanesoma. The gottres which are frequent among the inhabitants of this region have a structure similar to that of these tumors. It may be, say MM. Chatton and (Terrier.

Photographs Through Wall. A French scientist, chiet of the bureau of radiagraphy for the Paris. hospitals, has demonstrated that an X-ray apparatus can photograph subjects through a stone wall more than twenty-ave feet distant from the source of the rays. RIKOS DESTROY FISH.

lish-rating birds, and the necessity

tion has been furnished by Mr. Na-

poleon Comead, of Godbout, the

well-known nature observer, ornitho-

ogist and author of "Life and Sport

"I have heard of this shortage of

supplies on the coast, it is principally

ast of Esquiment Point. The sea-

son has been a very rough one, a creat deal of stormy weather and

logs, with a scarcity of balt in many

ocalities. Fishermen always try to

find some reasons for these things.

one of the most recent ones, (in

which there may be more than some

(bink) is the over protection of cer-

tuin species of birds, such a gannets,

cormorants, gutts, mprres, etc., all

the dust two years the taking of birds'

eggs of all kinds has been prohibited !

and for some time before that, there

were some considerable restrictions

in that line. There is no doubt that these birds have increased in num-

berg immensely. Some years ago I ]

spent a good deal of time on the Lab-

radur coast and amused myself col-

lecting data on birds, etc. I made an

estimate then, that some 60,000 dos-

one of birds' eggs of different kinds

were collected as food by the rest-

dents and fishermen. Aside from

and salmon fry, oggs, etc., and are

to be found all over the province. If

we make a very moderate calculation

we get astounding figures. Say we

have in the province of Quebec, in-

cluding the New Ungava territory.

culous that so much money should

at the same time protecting injur-

ions birds. The Merganser is not the

only genus cauting depredations

Why deprive the residents of Labra-

dor of using these birds as food when

they so much need it. I have no

doubt this has contributed to a great

extent to the present distress. See

birds, in "Northeastern Part of Lab-

rador. They need have no fear that

these birds will be exterminated by

the natives or residents, they are not

life, and my experience is that 'no

game either big or small will be kill

ed unless it can be used. Something

must be done shortly to have several

objectionable clauses of this Migra-

tory Birds Act ruled out or altered.

Hirds that have been exterminated or

threatened with extermination have

been so within the U.S. border

through market gunners, feather

of legislation in a great many states.

Canada has the greatest of breeding

grounds and our good cousins have

roped us in to replenish their deplet-

ed shooting resorts. In plain words

birds designated as non game birds.

.This, will be too late to relieve their

present suffering, but will help for

Mystery Bird.

The discovery of a strange and

feroclous bird is reported on the

Gower coast, Glamorganshire. The

bird's breast and face are said 'to be covered with dove-gray feathers, and

a parrow line of crimson and another

of blue encircle the eyes, the back

and head being of a dark brown

measuring seven and a half inches.

The bird is eleven inches in length

striking feature is its powerful, flat

the head of a fish. In many ways,
